5. Complete Survey Results 40

1. INTRODUCTION

As part of preparing its new Environmental Justice (EJ) Element, the City of Glendale conducted a robust, multifaceted, and multilingual public engagement program to collect local input and knowledge regarding EJ issues. The following programs/activities were completed:

- General education/announcements, including a dedicated project website with educational information and public comment opportunity, project factsheet (also available in print), email and social media announcements, and direct mailer sent to over 40,000 addresses in the City's EJ communities
- Pop-up booths (with interactive activities) hosted at Fire Service Day, Cruise Night, National Night Out, and the Fall Festival
- EJ survey (online and paper copies in English, Spanish, Armenian, Korean, and Tagalog)

This outreach was conducted to provide various opportunities for the Glendale community to share their experiences with topics related to EJ, including:

- Access to a range of public facilities and services
- Availability of safe and convenient places for recreation
- Access to healthy food options
- Housing conditions
- Pollution exposure and air quality
- Opportunities to share their input on City plans and programs

This report provides an overview of the input received.

WHAT IS ENVIRONMENTAL JUSTICE (EJ)?

EJ seeks to prevent and correct disproportionate environmental impacts on historically marginalized communities. Impacts can result from either the presence or absence of certain land uses, facilities, and physical and social infrastructure. For example, the presence of industrial land uses causing air pollution in a marginalized community is an EJ issue. The absence of parks and open space, community centers and recreational facilities, sidewalks and bike lanes, public transportation options, safe housing, and healthy food options in a marginalized community are also EJ issues. This report will use the United States Environmental Protection Agency (US EPA) definition of EJ:

Environmental Justice is “the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.” Fair treatment means that no group of people should bear a disproportionate share of the negative environmental consequences resulting from industrial, governmental, and commercial operations or policies.”

SENATE BILL 1000

Senate Bill 1000 (SB 1000), the Planning for Healthy Communities Act, was signed into law by Governor Edmond G. Brown, Jr. on September 24, 2016. SB 1000 requires cities and counties with Disadvantaged Communities (as described below) to adopt an EJ Element or integrate EJ goals, objectives, and policies into other elements of their general plans. The intent of this legislation is to create healthier cities and counties by protecting sensitive land uses and prioritizing the needs of Disadvantaged Communities (also referred to as EJ Communities in this document). The City of Glendale has chosen to prepare a dedicated EJ Element so that all EJ-related goals and policies are easily accessible and to provide clear guidance on the fair and equitable distribution of community benefits.

DISADVANTAGED COMMUNITIES

The term “Disadvantaged Community” is a broad designation that generally includes low-income areas disproportionately affected by environmental, health, and other hazards. In relation to EJ, Government Code Section 65302, as amended by SB 1000, defines a Disadvantaged Community as follows:

A **Disadvantaged Community (DAC)** is an area identified by the California Environmental Protection Agency (CalEPA) pursuant to Section 39711 of the Health and Safety Code or a low-income area that is disproportionately affected by environmental pollution and other hazards that can lead to negative health effects, exposure, or environmental degradation.

2. GENERAL OUTREACH

GENERAL PLAN WEBSITE

The Glendale General Plan website (glendaleplan.com) includes an overview of the updates Glendale is making to the General Plan. Viewers can access information regarding each of the General Plan Elements that are new or are being amended, eight mobility plans that the City has developed to encourage a connected and sustainable Glendale, the Glendale EJ Survey, and how to get involved.

Between January 1, 2024, and October 30, 2024, the Glendale General Plan website received 1,669 visits and 3,396 page views by 986 unique visitors. About 80% were new visitors and about 20% were returning.

The website received the most traffic in July 2024 with over 200 visitors, as shown in the chart below.

Environmental Justice Element

The City is developing its first Environmental Justice Element, which will reflect the City's efforts to promote equal access to resources and to create a healthy, safe, and inclusive community for all to enjoy. Through the process of creating the Element, the City will evaluate its current policies and create new ones to minimize pollution and its effects on all neighborhoods, with an emphasis on those in disadvantaged communities. This effort will be closely tied to ongoing updates to other General Plan Elements, including the Land Use, Circulation, and Safety Elements as well as other citywide plans like the Climate Action and Adaptation Plan, Pedestrian Plan, and Bicycle Transportation Plan.

What is Environmental Justice?

The U.S. Environmental Protection Agency defines environmental justice as, "The fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies."

Environmental justice is about making sure everyone, no matter what they look like or how much money they have, has equal access to clean air, water, land, and other resources. It's about creating and enforcing rules so that no one is unfairly harmed by pollution or other environmental problems.

Why is the City Creating an Environmental Justice Element?

The state of California now requires cities with disadvantaged communities to incorporate environmental justice into their general plan. A disadvantaged community is a part of a neighborhood that is unfairly affected by pollution and other dangers, which can cause health problems, exposure to harmful substances, or damage to the environment. These areas deserve special attention to address issues of environmental justice.

The Environmental Justice Element will address the following topics:

- Pollution Exposure & Air Quality
- Public Facility Access
- Healthy Food Access
- Safe and Sanitary Homes
- Physical Activity Access
- Community Engagement
- Improvements and Programs
- Unique Health Risks

Environmental Justice Element Timeline

- Public outreach and background research: Spring and Summer 2024
- Public draft: Late 2024/early 2025
- Final draft for City Council Adoption: Anticipated 2025

Overview of Glendale General Plan Website Traffic, January – October 2024

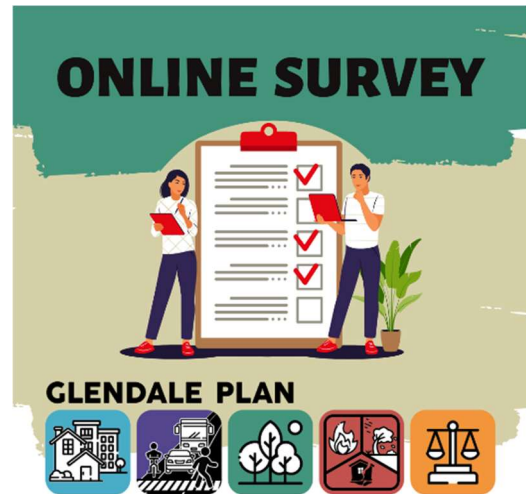

SOCIAL MEDIA

The City of Glendale utilizes a variety of social media platforms to disperse information to its community, including Instagram, Facebook, Twitter, and YouTube. These platforms were used to spread the word about the Glendale EJ Survey, encouraged folks to visit the Glendale Plan website, and highlight outreach efforts at pop-up events.

City staff promoted the EJ Element on social media between April 25, 2024, and August 15, 2024. Posts on social media received a combined total of 7,739 views and reached an audience of over 23,000 followers. The next page includes screenshots of the Instagram posts that were published by the City.

Below is a detailed breakdown for all City-created EJ posts, including those promoting the EJ survey:

July 18, 2024

- The City created three EJ posts: two that promoted the EJ survey and one that highlighted the City's outreach efforts at the pop-up booth.
- The Glendale EJ Survey video, which featured a TikTok clip and survey link, achieved 6,606 views and six shares on the Community Development Department (CDD) account.
- This video was also shared via Stories on the MyGlendale account, which has a follower base of 17,500, and on the ChooseGlendale account, managed by the Economic Development Division, which has 5,517 followers. (No specific view counts for are available for these Stories).

April 25, 2024

The post covering the EJ Element Outreach pop-up booth, which included the survey link, received 632 views. This post was only shared on the City's main CDD account and did not appear on other platforms.

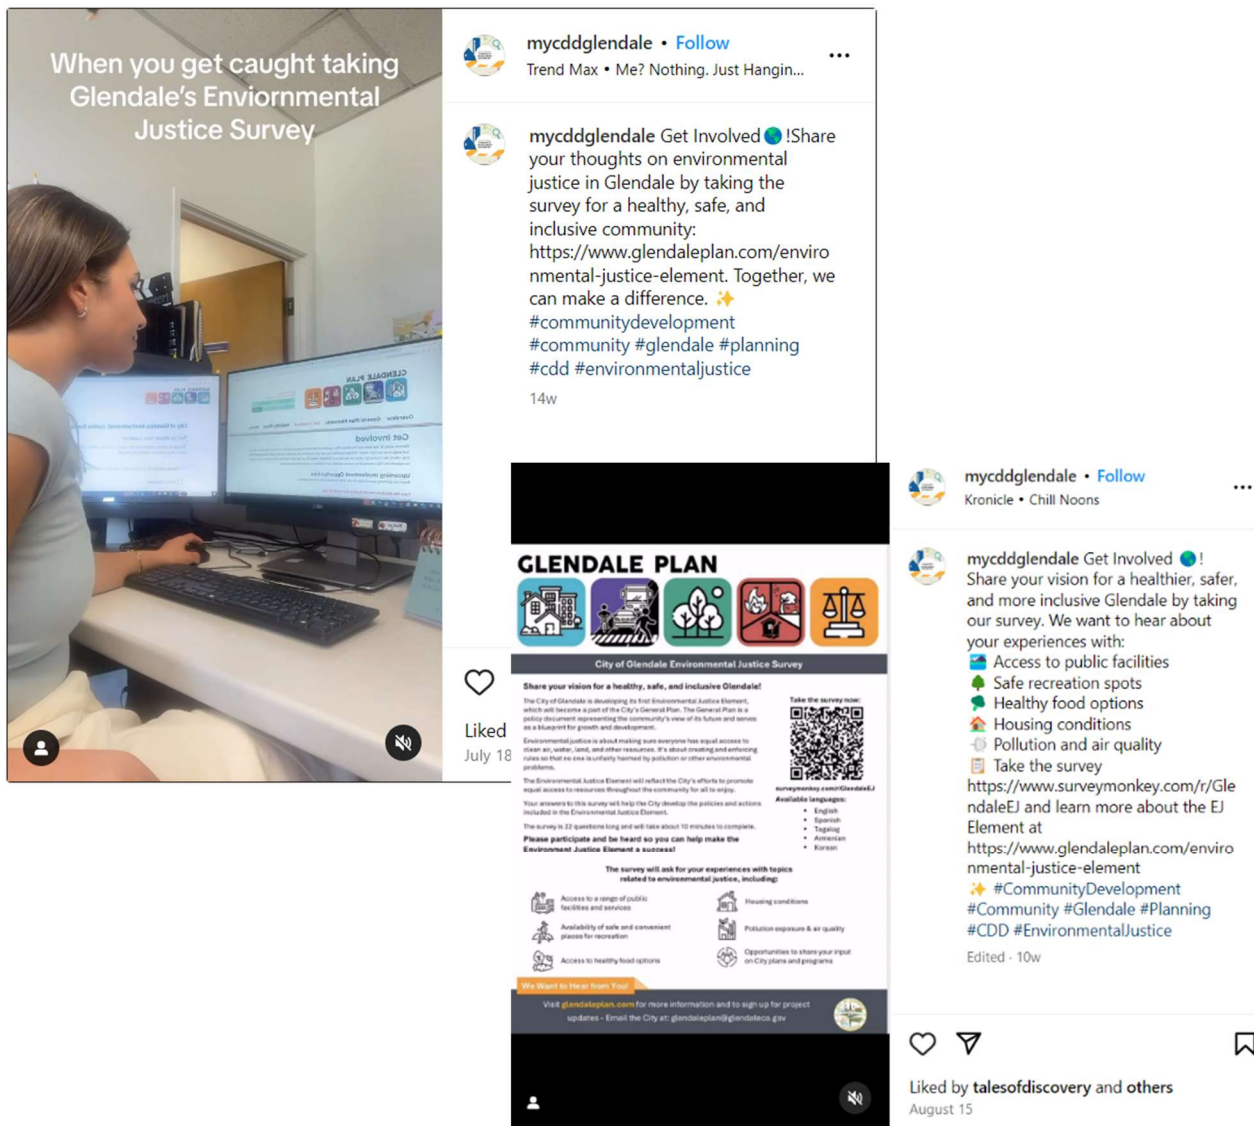

August 15, 2024

The final video gained 501 views on the City's CDD account. It was also reshared via Stories on both MyGlendale and ChooseGlendale, with potential exposure to 17,500 and 5,517 followers, respectively. Additionally, a resident from another public agency shared the video on their account, which has over 1,000 followers.

Other Story Shares

Several Stories were posted between these dates; however, the City is unable to track the exact engagement, as Stories remain available for only 24 hours. Still, these posts were likely seen by the follower counts provided above.

ADDITIONAL EFFORTS

Environmental Justice Element Survey

Visit glendaleplan.com for more information on this new General Plan Element and to sign up for project updates

Survey: www.surveymonkey.com/r/GlendaleEJ

The survey will ask for your experiences with topics related to environmental justice, including:

- Access to a range of public facilities and services
- Housing conditions
- Availability of safe and convenient places for recreation
- Pollution exposure & air quality
- Access to healthy food options
- Opportunities to share your input on City plans and programs

GLENDALE PLAN

Planning Commission Call In 818-937-8100 5-1-2024

City staff provided information about the new EJ Element during various televised public hearings, and Planning Division outreach and community meetings for other long-range planning projects. The new EJ Element and survey was announced at the May 1, 2024 Planning Commission meeting and at City Council meetings. The EJ survey was also promoted at the Objective Design Standard meetings with the Northwest Glendale Homeowners Association on May 13, 2024, a public meeting at the Sparr Heights Community Center on May 22, 2024, and a virtual meeting on May 29, 2024. Email blasts regarding the new EJ Element and open survey were sent to every City employee (approximately 1,800-2,000 individuals) on May 20, 2024, and to all HOA representatives and interested parties who had signed up for the GlendalePlan.com notices (67 total) on August 15, 2024.

EJ flyers with the EJ survey link and QR code were also distributed at the Glendale Central Library.

3. POP-UP EVENTS

Photos on this page are from Cruise Night 2024

Fire Service Day	Cruise Night	National Night Out	Fall Festival
May 11, 2024 9:00 AM to 2:00 PM	July 20, 2024 5:30 PM to 10:30 PM	August 6, 2024 5:00 PM to 7:30 PM	October 26, 2024 11:00 AM to 2:00 PM
The Glendale Fire Department annually invites the community to celebrate Fire Service Day. Activities included a pancake breakfast, live demonstrations, and recruitment information. Events like this boost community safety awareness.	Cruise Night is one of Glendale's longest running events that showcases around 300 – 400 classic and exotic cars, with over 45,000 in attendance. Visitors can listen to live music, watch fireworks, and enjoy other activities such as various vendor booths.	The Glendale Police Department and Community Services & Parks Department hosts an annual event where neighbors get the chance to get to know each other and share concerns, strategies, and ideas for safer communities. There are food, games, prizes, and community resources.	Community Services & Parks hosts the annual Fall Festival featuring various carnival games, arts & crafts, and seasonal activities for children and also informational booths of the programs and services provided by the various City departments.

Pop-Up Event Summary

At all four citywide events, the consultant and City staff facilitated an EJ outreach booth for residents and visitors to learn more about the Glendale General Plan updates, including the EJ Element. Visitors were given opportunities to voice their ideas or concerns about their community through multiple activities, such as placing stickers on poster boards as shown on the following page. With the input received through the activities and discussion, community members indicated that the City's public facilities and services, as well as safe and sanitary homes and physical activities, were areas that need the most attention. At Fire Service Day, Cruise Night and National Night Out, handouts were available with the EJ survey link and QR code, with staff encouraging attendees to take the EJ survey at their convenience.

Postcard Activity

At Cruise Night, National Night Out, and the Fall Festival, City staff facilitated an activity where attendees wrote their thoughts, experiences, and suggestions on different postcards regarding the main topic areas (e.g. access to healthy food, air quality, etc.). Each topic area postcard was printed in a different color. While this activity was intended to provide another means for attendees to provide EJ input, it also became an attractive activity for children who enjoyed drawing pictures related to each topic. The postcards with suggestions and drawings were then hung on twine within the outreach booth, creating colorful string flags. While the children occupied coloring, staff was able to engage parents and guardians in conversation related to EJ and obtain additional feedback.

EJ Investment Activity

At the National Night Out event, community members were also able to participate in an EJ investment activity, where each participant received a certain number of coins to spend how they would like on six potential solutions/programs. These programs included:

1. Improve conditions and safety of sidewalks and crosswalks
2. Install new bicycle facilities like bike lanes and safety features
3. Expand/Promote Public Transit Options
4. Expand Local Library, Museum, Cultural Center Options
5. Expand Recreation Activities for people of different ages and abilities
6. Improve easy access to a park or recreation center

Programs 4, 5, and 6 were the most selected and received an almost equal number of coins.

Fire Service Day

GLENDAL PLAN

CITY OF GLENDALE
ENVIRONMENTAL JUSTICE INPUT

Environmental justice is about making sure everyone has equal access to clean air, water, land, and other resources. It's about creating and enforcing rules so that no one is unfairly harmed by pollution or other environmental problems. What **three** environmental justice issue areas do you think need the most attention in Glendale?

 AIR QUALITY & POLLUTION A healthy community with clean air, water, and soil.	 SAFE HOUSING Safe and comfortable homes free of problems like mold, pests, or structural damage.
 PUBLIC FACILITIES & SERVICES Availability of community centers, libraries, museums, sidewalks, bike lanes, bus routes, emergency services, health care, and daycare.	 PHYSICAL ACTIVITY Safe and convenient places such as parks, open space, trails, and recreation centers where people can do different exercises.
 HEALTHY FOOD People throughout the city have easy access to healthy, nutritious food options that they can afford.	 PUBLIC INPUT Opportunities for the public to review and comment on draft City plans or programs and provide the City with general feedback.

4. SURVEY SUMMARY

The online survey was open between April 1, 2024, and September 10, 2024, and staff promoted the EJ survey using social media, direct mailers, email blasts, public announcements at hearings and public meetings, and face-to-face contact at pop-up events, as described in the Public Outreach and Pop-Up Events sections above. A total of 248 responses were received. The survey consisted of 22 questions, of which 11 were related to EJ. The other 11 questions were related to the demographics of the respondent and optional input for email updates. For full survey results, please refer to section 5.

Below is a summary of survey questions related to the respondents' association with the City of Glendale.

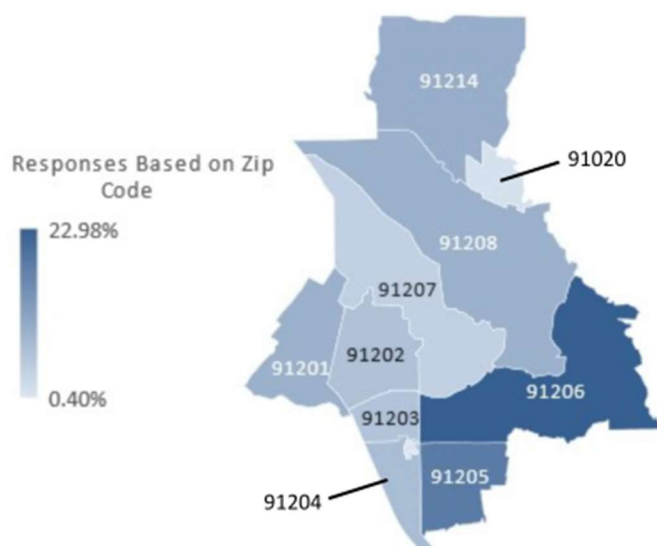

DO YOU LIVE, WORK, OR STUDY IN GLENDALE?

80.7% of survey respondents indicated that they live in Glendale, 41.1% work in Glendale, and 3.2% study in Glendale. The remaining respondents chose "Other" or indicated that they do not live, work, or study in Glendale. Some of the respondents that chose "Other" included that they were organizational members, have children attending Glendale schools, or reside in the unincorporated areas.

ASSOCIATED ZIP CODE WHERE RESPONDENTS LIVE, WORK, OR STUDY IN GLENDALE

When asked to select the ZIP code for where the respondents either primarily live, work, or study in Glendale, out of 248 respondents, approximately 23% of respondents chose 91206, followed by 18% for 91205 and 10% for 91204. In review of the survey data, a large portion of survey respondents had some type of activity in the central and south areas of Glendale, where Glendale's Disadvantaged Communities are mainly located. More details on the numbers of respondents by ZIP code are provided on the following page.

RESPONDENTS BY ZIP CODE

The top three ZIP codes identified by the 248 respondents were 91206, 91205, and 91204.

ZIP Code	Percent	Responses
91206	22.98%	57
91205	18.15%	45
91214	9.68%	24
91201	9.27%	23
91208	9.27%	23
91204	7.26%	18
91202	6.45%	16
91203	6.05%	15
91207	4.03%	10
91020	1.21%	3
91210	0.40%	1
Other	3.23%	8
N/A*	2.02%	5
Total Answered	100%	248
Total Skipped	0	0

**Respondent does not reside, work, or study in Glendale*

Additional ZIP Codes Reported Under “Other”

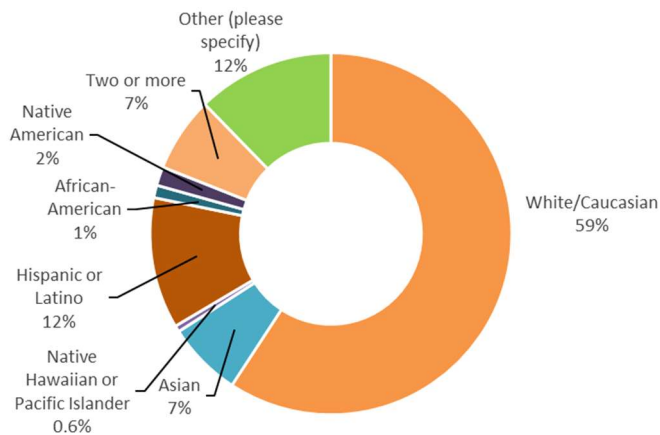

Of the respondents who selected "other" and provided a ZIP code, the entries included 91207, 91205, 91107, 91504, 90026, and 91352.

RESPONDENTS BY NEIGHBORHOOD

Of the survey respondents who indicated their neighborhood where they may live, work, or study in Glendale, approximately 17% chose the City Center, followed by 9.4% for Verdugo Woodlands, 8.5% for Crescenta Highlands, and 7.1% for Adams Hill and Citrus Grove.

Neighborhood	Percent	Neighborhood	Percent
Adams Hill	7.14%	Oakmont	0.45%
Brockmont	0.89%	Pacific-Edison	4.91%
Chevy Chase	2.23%	Pelanconi	0.89%
Citrus Grove	7.14%	Rancho San Rafael	0.00%
City Center	16.96%	Riverside Rancho	2.68%
College Hills	0.45%	Rossmoyne	5.36%
Crescenta Highlands	8.48%	San Gabriel Mountains	0.00%
El Miradero	0.89%	San Rafael Hills	0.45%
Emerald Isle	0.45%	Scholl Canyon	0
Freemont Park	0.89%	Somerset	2.68%
Glenoaks Canyon	0.45%	Sparr Heights	0.00%
Glenwood	4.02%	Tropico	2.23%
Grand Central	0.89%	Verdugo Mountains	0.89%
Grandview	4.91%	Verdugo Viejo	0
Greenbriar	0.00%	Verdugo Woodlands	9.38%
Mariposa	3.13%	Vineyard	3.57
Montecito Park	0.45%	Whiting Woods	0.00%
Montrose Verdugo City	2.68%	Woodbury	0.89%
Moorpark	0.45%	Other or unsure	2.23%

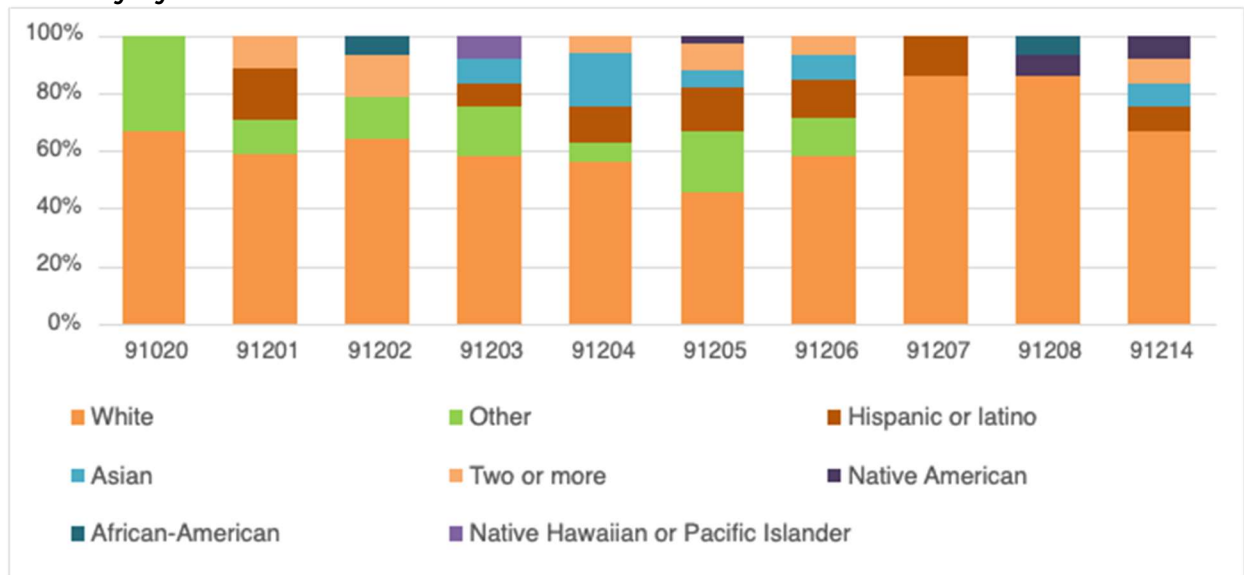

Below is a summary of the demographic survey question responses.

ETHNICITY

Of the survey respondents who provided their ethnicity information, a majority identified as White/Caucasian (59%), followed by Other (12%), Hispanic or Latino (12%), Asian (7%), and Two or More (7%), with the remaining representing Native American, Native Hawaiian or Pacific Islander, and Black or African American. Most respondents that chose “Other” identified as Armenian.

Ethnicity by ZIP Code

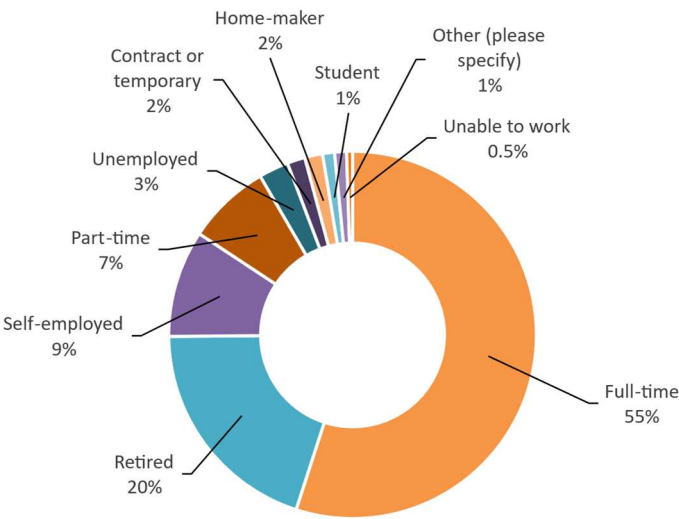

Ethnicity by ZIP Code Observations

Respondents from ZIP codes 91204, 91205, and 91206 represent roughly 50% of all survey participants. The ethnic breakdown for these three ZIP codes are as follows:

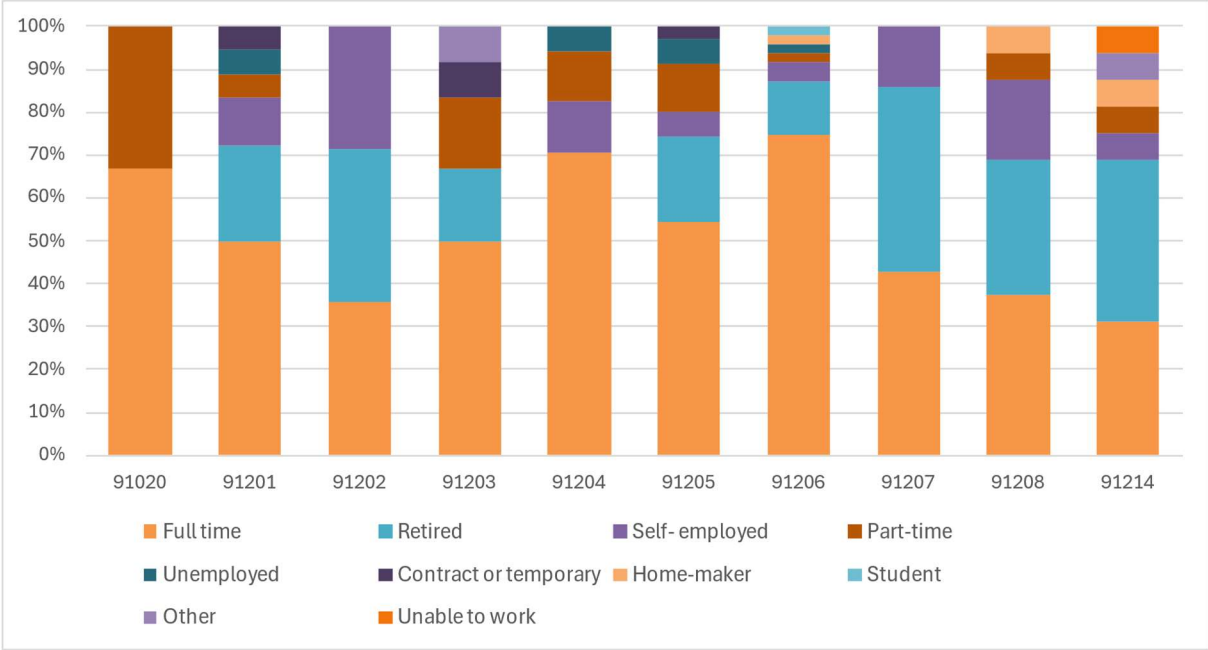

- **91204:** 56% White, 6% Other, 13% Hispanic, 19% Asian, 6% Two or More.
- **91205:** 46% White, 21% Other, 15% Hispanic, 6% Asian, 9% Two or More, 3% Native American.
- **91206:** 60% White, 14% Other, 14% Hispanic, 9% Asian, 7% Two or More.

EMPLOYMENT STATUS

Regarding employment status, 55% of respondents reported having a full-time job, 20% were retired, 9% were self-employed, and 7% identified as part-time employees. The remaining respondents identified as a mix of unemployed individuals, homemakers, students, and some unable to work. Some who indicated “other” identified as volunteers.

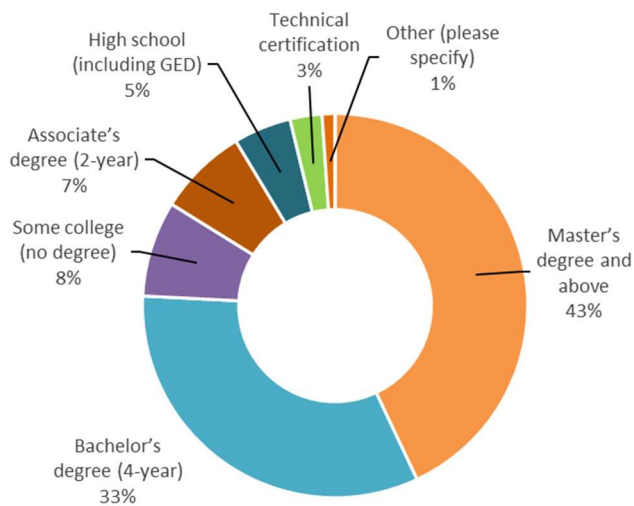

Employment Status by ZIP Code

Employment Status by ZIP Code Observations

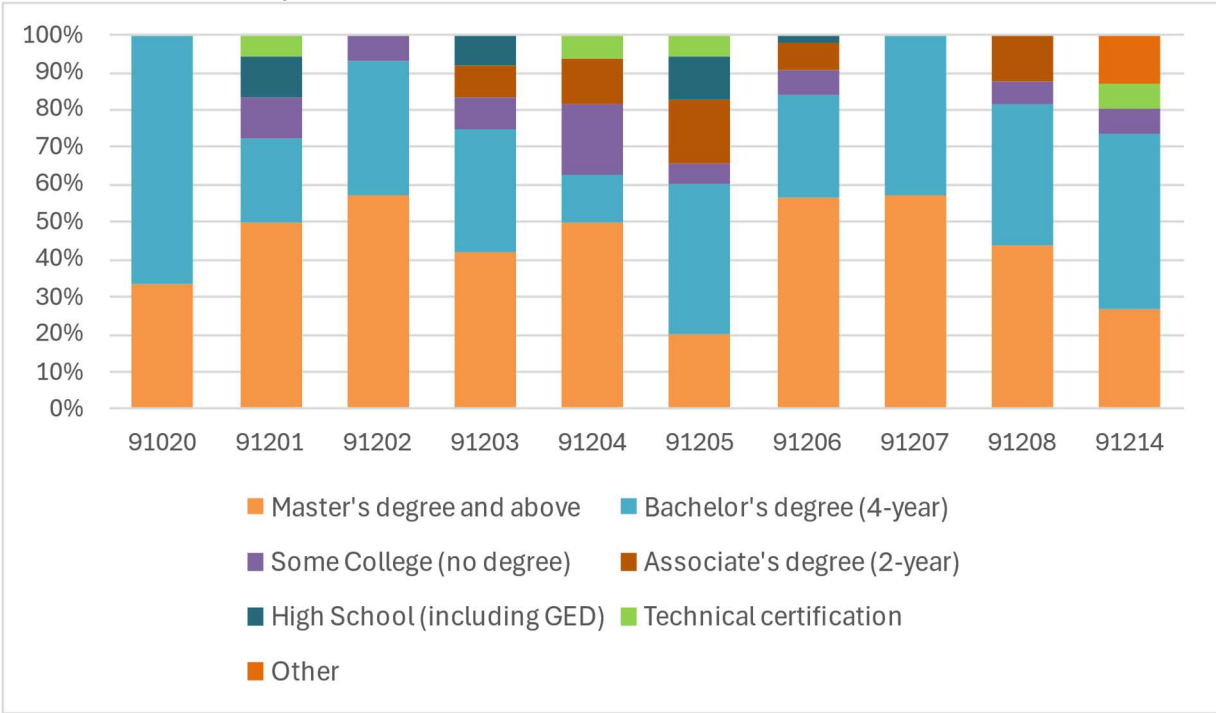

Respondents from ZIP codes 91204, 91205, and 91206 represent roughly 50% of all survey participants, and have high rates of full-time employment status.

LEVEL OF EDUCATION

In terms of the highest level of education attained, 43% reported a master's degree or above, 33% reported a bachelor's degree, 8% reported some college (no degree), 7% reported an associate's degree, 5% reported a high school diploma, 3% reported a technical certification, and 1% reported "other". No one indicated that they have less than a high school diploma.

Level of Education by ZIP Code

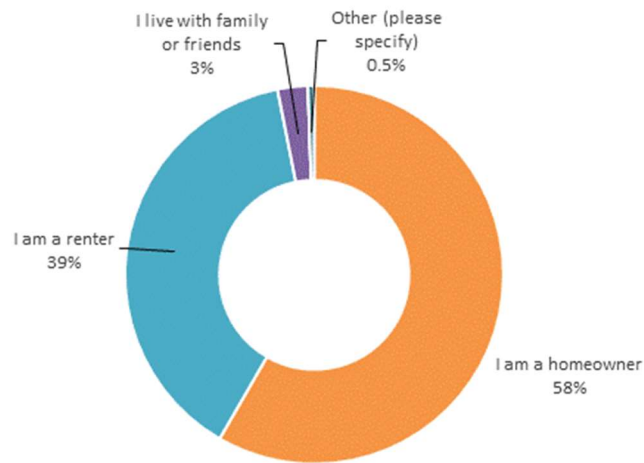

Level of Education by ZIP Code Observations

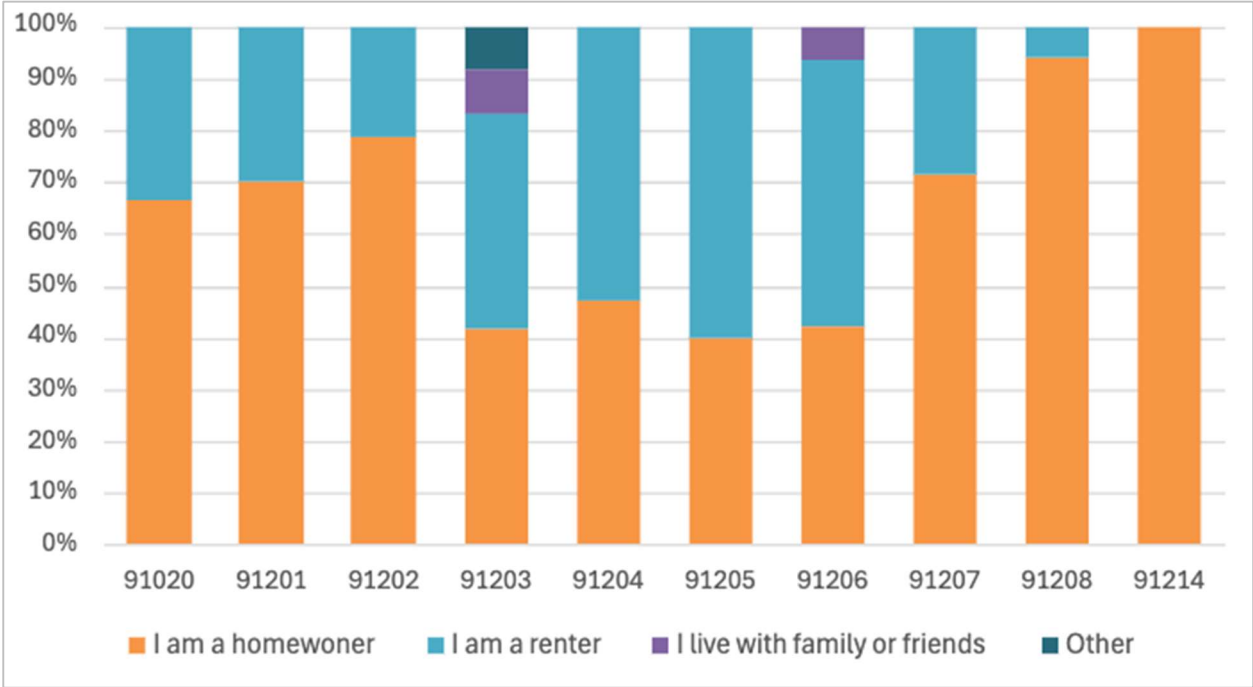

A percentage of respondents in every ZIP code in the City report having at least a bachelor's degree. A portion of respondents in most ZIP codes also report having a master's degree.

HOUSING STATUS

58% of survey respondents who provided information on their housing status were homeowners, while 39% were renters, 3% lived with family or friends, and 0.5% indicated “other” housing status. No one indicated that they are currently without permanent shelter.

Housing Status by ZIP Code

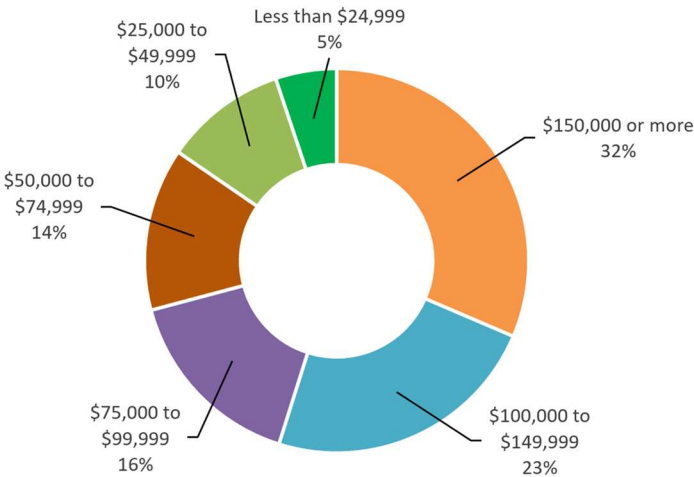

Housing Status by ZIP Code Observations

Southern Glendale ZIP codes, such as 91203, 91204, and 91205, tend to have a higher rate of respondents who are renters in comparison to northern ZIP codes, such as 91207, 91208, and 91214.

HOUSEHOLD INCOME

In terms of household income, 32% earn \$150,000 or more, 23% earn \$100,000 to \$149,999, 16% earn \$75,000 to \$99,999, 14% earn \$50,000 to \$74,999, 10% earn \$25,000 to \$49,999, and 5% earn less than \$24,999.

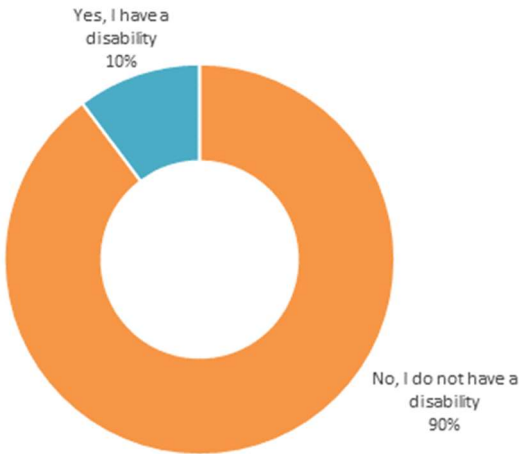

Household Income by ZIP Code

Household Income by ZIP Code Observations

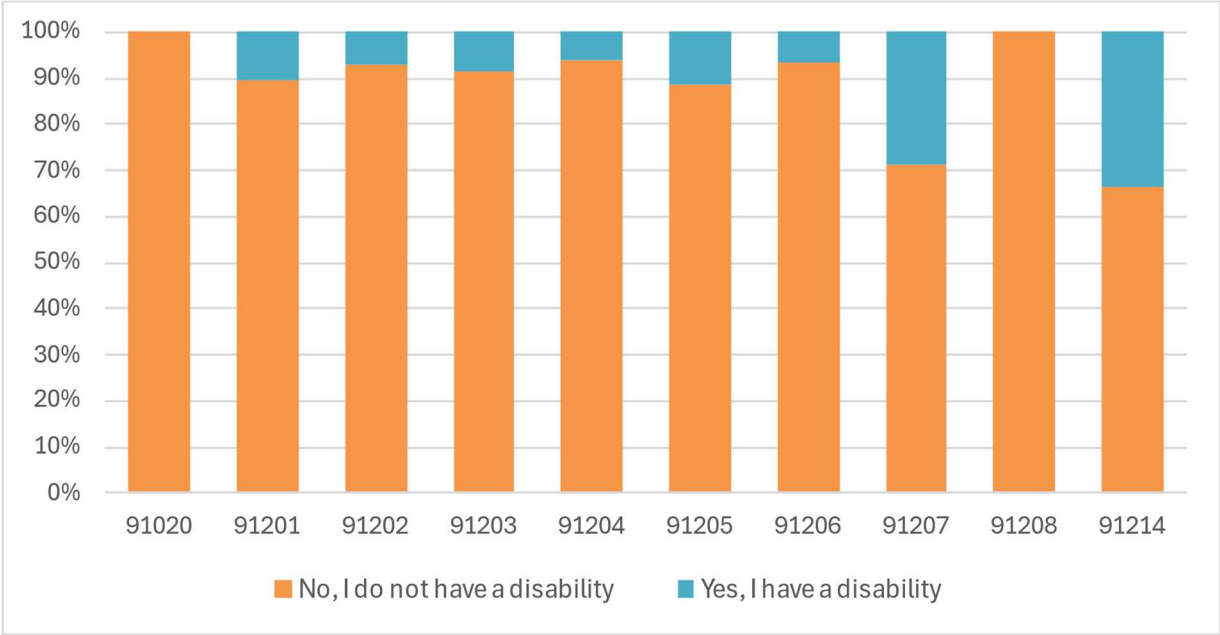

Respondents who have a total household income of \$150,000 or more are prevalent in the central and northern Glendale ZIP codes, such as 91207, 91208, and 91204. Respondents who earn less than \$24,999 tend to be in the western and southern ZIP codes, such as 91201 and 91203, which are also identified as Disadvantaged Communities.

CONSIDERATION OF DISABILITIES

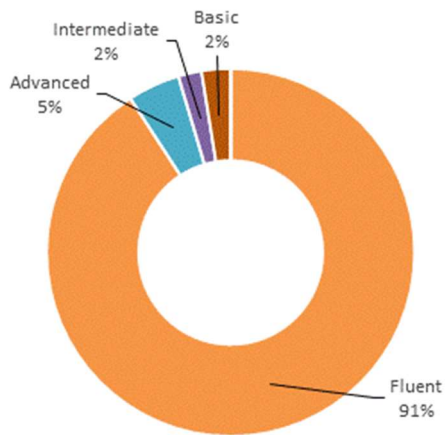

For consideration of disabilities, 90% of survey respondents indicated that they do not have a disability, while 10% indicated that they do have a disability.

Consideration of Disabilities by ZIP Code

Consideration of Disabilities by ZIP Code Observations

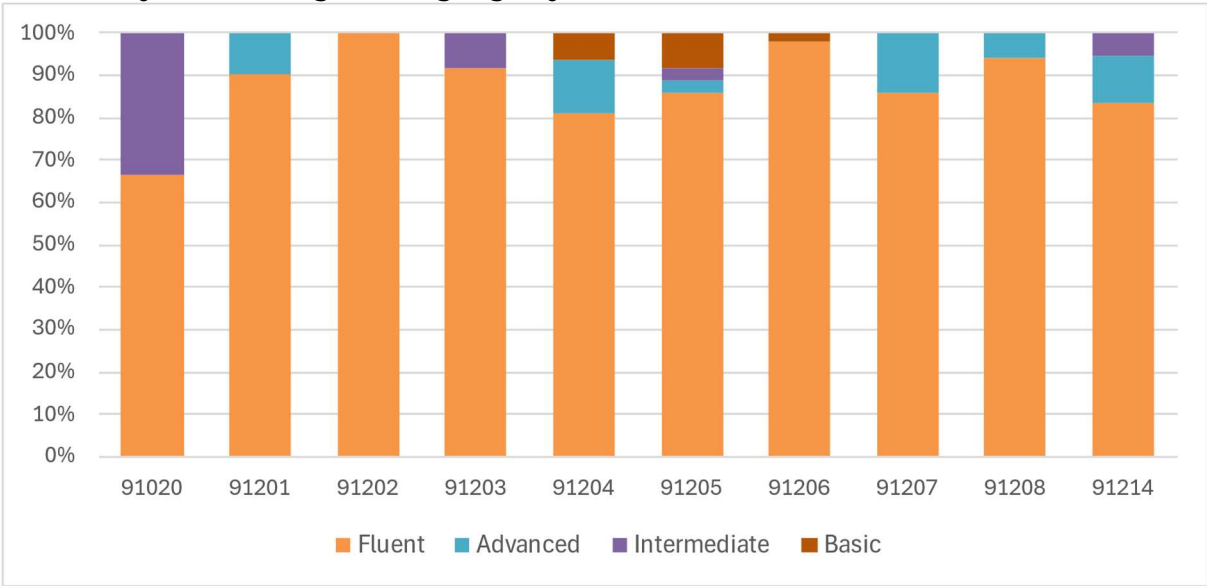

There are at least a few respondents who report having a disability in all ZIP codes, except for 91020 and 91208.

PROFICIENCY LEVEL IN ENGLISH LANGUAGE

Regarding proficiency level in English language, 91% indicated that they are fluent, 5% are advanced, 2% are intermediate, and 2% are basic. No survey respondents chose “None” as their choice.

Proficiency Level in English Language by ZIP Code

Proficiency Level in English Language by ZIP Code Observations

There is an overall high percentage of English fluency throughout the City, as well as some dispersed advanced/intermediate/basic respondents. The respondents who chose “Basic” are clustered within the southeastern ZIP codes of 91204, 91205, and 91206.

IDENTIFYING EJ COMMUNITIES

Survey respondents were asked to review a map of “disadvantaged communities” that were identified by tools such as CalEnviroScreen and the California Air Resources Board Priority Populations Mapping Tool. Based on these tools, Glendale has several neighborhoods generally located near downtown and the southern area of the City that are considered disadvantaged communities. Survey respondents then had the opportunity to identify *additional areas* in the City beyond those shown on the map.

Figure 1, *Map of EJ Communities in Glendale, Including Input from Survey Respondents*, is an updated version of the map reflecting these suggestions. Each additional area was suggested by a single respondent. While this feedback is valuable, it does not justify designating entire census tracts as EJ communities. This summary acknowledges these areas which the City may consider investigating further. Regardless, the City will include goals, policies, and actions within the EJ Element to support residents citywide, not only those in designated EJ communities.

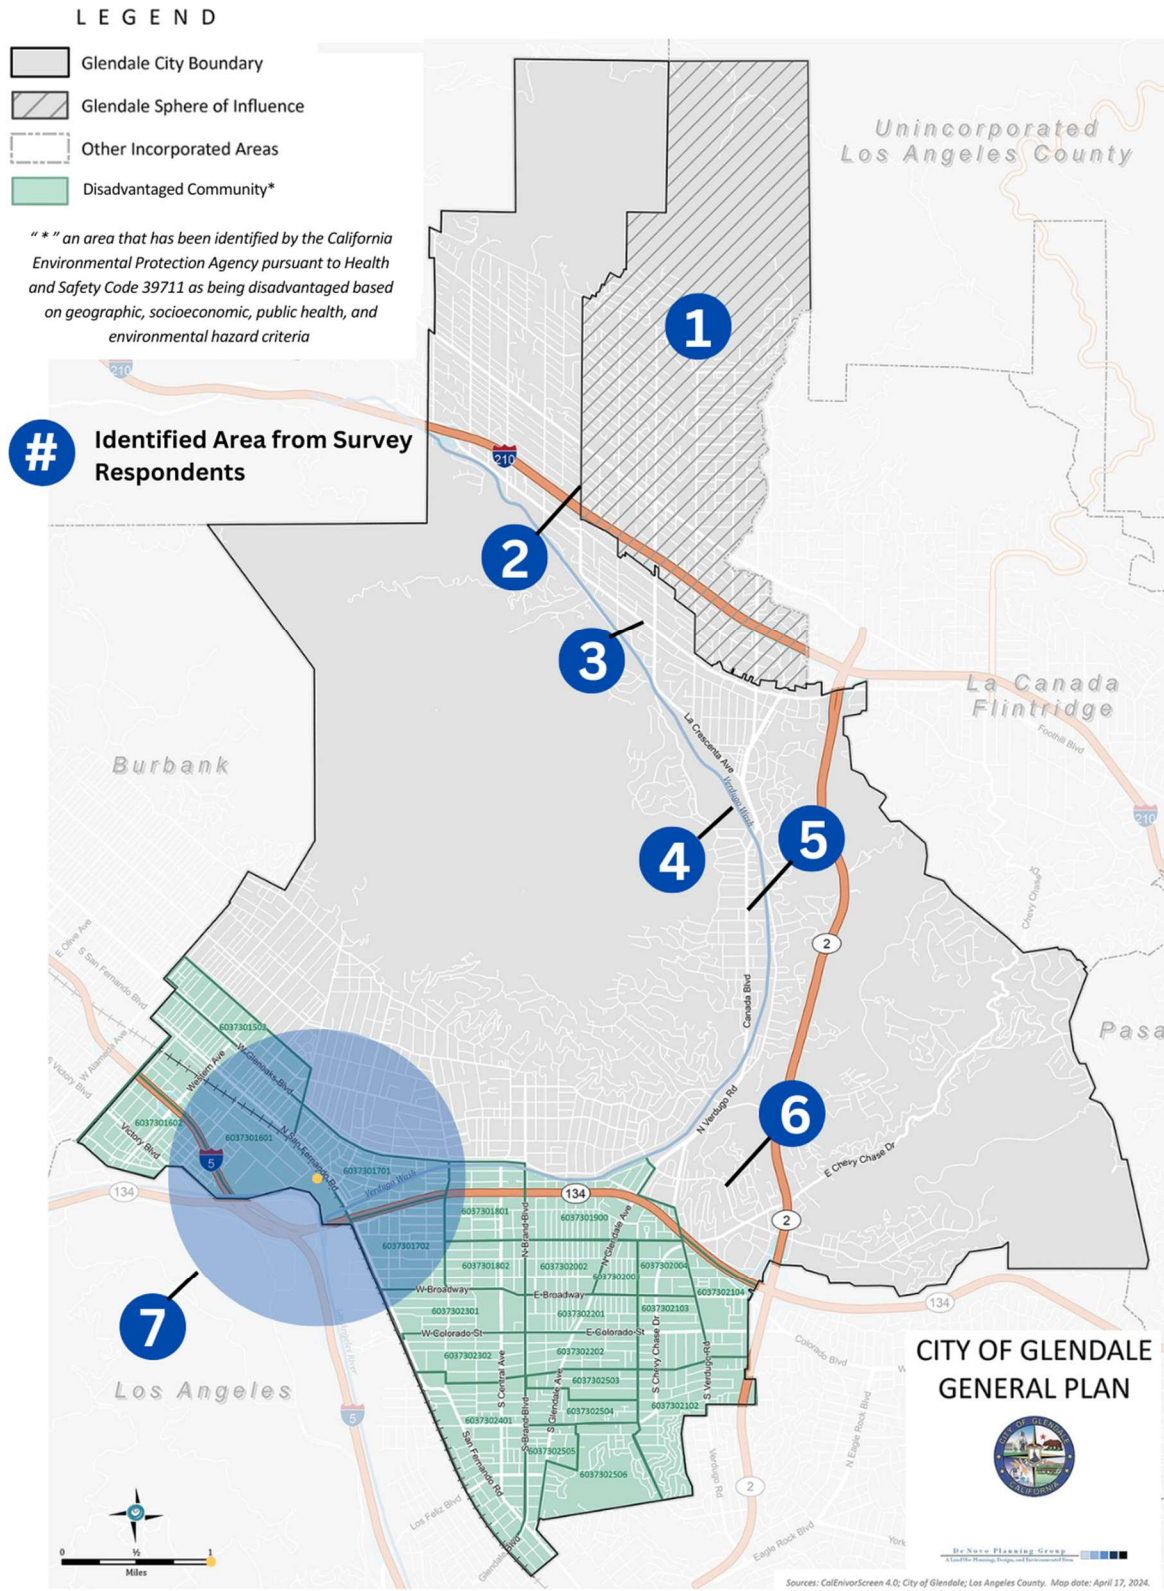

Additional Areas Identified by Survey Respondents

- 1 Apartments in the foothills by La Crescenta
- 2 Area near the 210 Freeway around Pennsylvania Street
- 3 Verdugo City
- 4 Areas along the Verdugo Wash
- 5 Verdugo Woodlands
- 6 Woodbury neighborhood
- 7 Areas within a one-mile radius of the Grayson Power Plant

Additional Comments

- All of Glendale should be evaluated, especially in terms of access/transportation
- Review areas around schools – increase green space
- I believe the entire city is entitled to environmental justice but that it means different things to different neighborhoods. In south Glendale it means more parks and open space. In canyons and near woodlands it means better fire protection. Near freeways it means filters to clean the air.
- The City is perfect as is. Safe and clean.

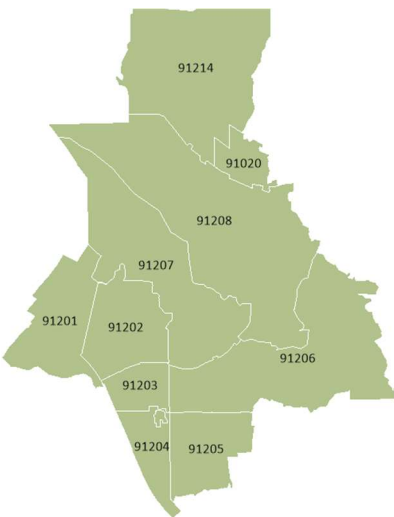

Figure 1 - Map of Disadvantaged Communities in Glendale, Including Community Input

PROMOTE PUBLIC FACILITIES

Access and availability of public facilities is an aspect of the built environment that may disproportionately limit the opportunities of EJ communities. If EJ communities have unequal access to public facilities, or if a city does not provide adequate facilities for public use, EJ communities may be limited in their ability to access essential resources. Limited access to these resources can lead to reduced lifespans, poorer health outcomes, and diminished mental well-being. Intentional planning of parks and transportation infrastructure can help provide equal access to resources for all communities within a city.

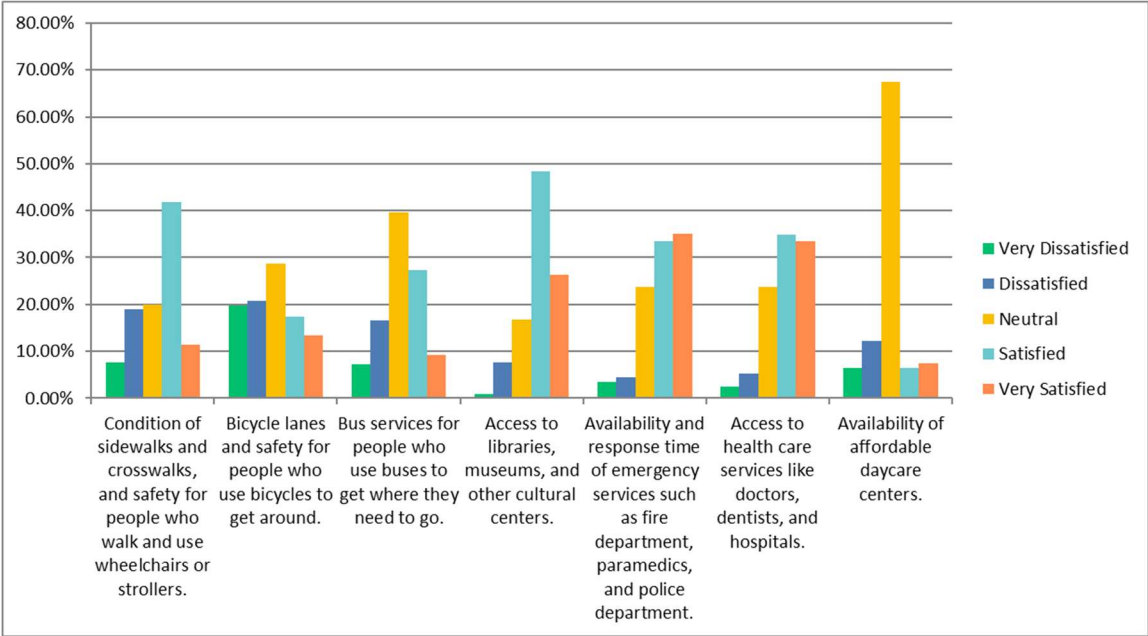

In Figure 2, *Levels of Satisfaction for Public Facilities in Glendale Results*, survey respondents indicated high satisfactory rates for “Availability and response time of emergency services such as fire department, paramedics, and police department,” (35% Very Satisfied, 33.5% Satisfied) and “Access to health care services like doctors, dentists, and hospitals” (33.5% Very Satisfied, 35% Satisfied). Some areas of higher dissatisfaction include “Bicycle lanes and safety for people who use bicycles to get around” (20% Very Dissatisfied, 21% Dissatisfied), and “Condition of sidewalks and crosswalks, and safety for people who walk and use wheelchairs or strollers: (8% Very Dissatisfied, 19% Dissatisfied).

ZIP Code Observations

When taking a deeper dive into the levels of satisfaction for bicycle infrastructure and analyzing the results by ZIP code, the neighborhoods in south/east Glendale, such as 91204, 91205, and 91206, have a high rate of Neutral to Very Dissatisfied responses. On the contrary, ZIP code 91214 (north Glendale) has a high range of Very Satisfied to Neutral responses. Please see the graphic on the left for ZIP code reference.

Figure 2 – Levels of Satisfaction for Public Facilities in Glendale

PROMOTE HEALTHY FOOD ACCESS

Healthy food access encompasses the following three interrelated topics:

- Nutritionally adequate, culturally appropriate, and affordable food;
- Income sufficient to purchase healthy food; and
- Proximity and ability to travel to a food source that offers affordable, nutritionally adequate, and culturally appropriate food.

Ensuring adequate access to healthy food is challenging in many communities. Many communities, especially those in low-income areas, lack retailers with a sufficient selection of healthy or fresh foods which exacerbates public health challenges. Healthy food access is closely linked to individual food security, defined as one’s ability to obtain enough food to lead an active, healthy life. It is also linked to community food security, which is when all community residents obtain a safe, culturally acceptable, nutritionally adequate diet through a sustainable food system that encourages community self-reliance and social justice. Promoting healthy food access directly supports community food security.

In review of Figure 3, *Levels of Satisfaction for Healthy Food Options in Glendale Results*, survey respondents had indicated high levels of being “Satisfied” with “Places to get healthy food” (43.5%), “Variety of healthy food” (41.5%), and “Quality of healthy food” (47.5%). The category with the highest levels of dissatisfaction was the “Cost of healthy food,” with 21% Very Dissatisfied and 32% Dissatisfied.

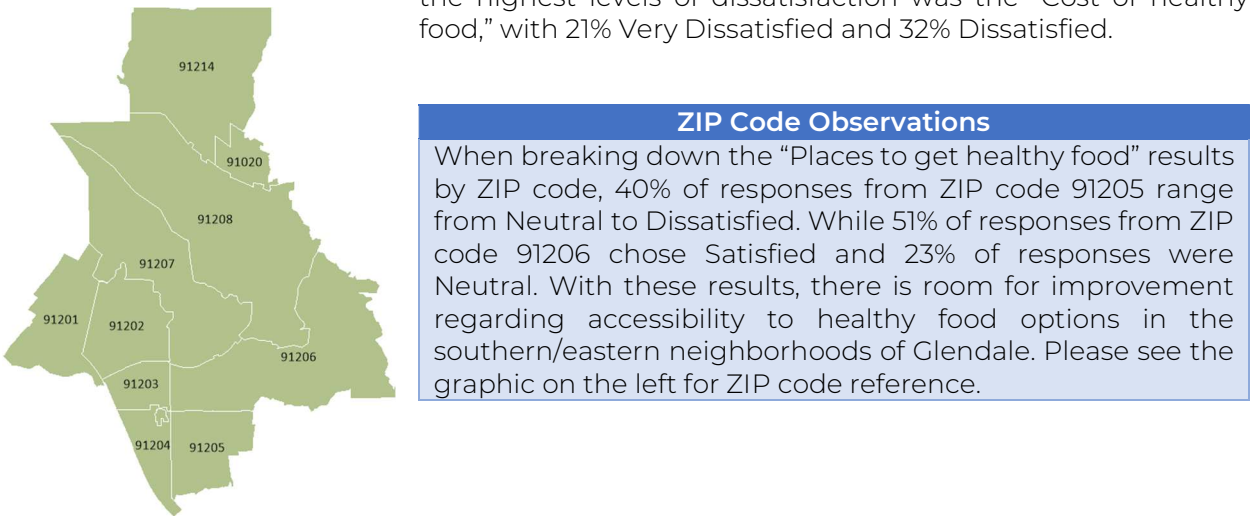

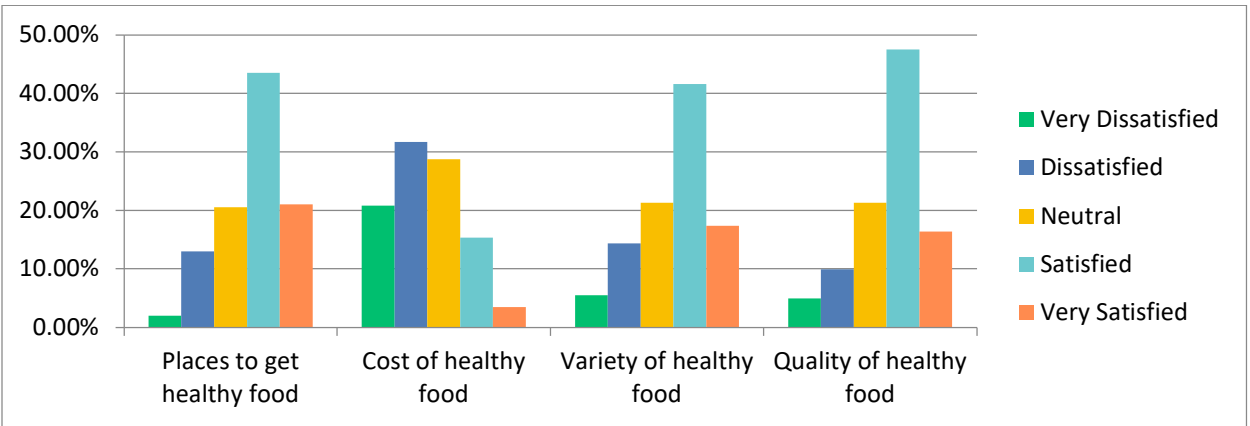

Figure 3 - Levels of Satisfaction for Healthy Food Options in Glendale

PROMOTE SAFE AND SANITARY HOMES

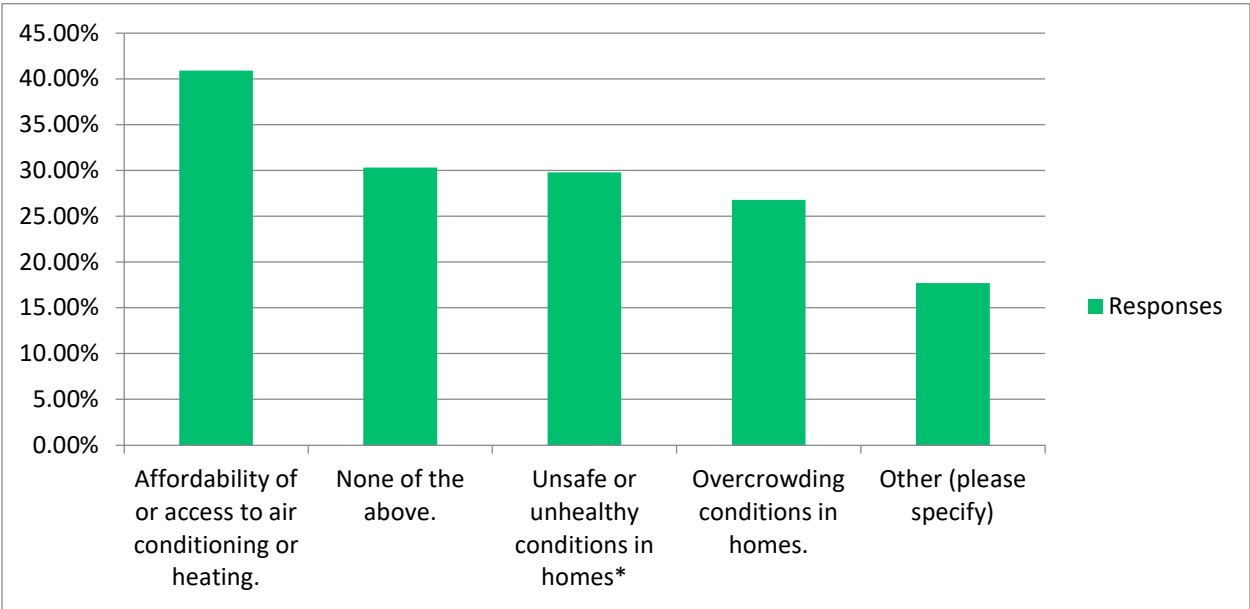

The condition of homes in an EJ Community may have negative health impacts on its residents. These health impacts stem from issues such as poor indoor air quality, toxic building materials, exposure to climate variation such as excess heat or cold, improper ventilation, and structural insecurity. Unsafe housing conditions can be a result of the age of the dwelling, which increases the likelihood of the presence of dangerous materials like lead and asbestos that have significant negative health impacts.

EJ communities often have a larger number of older units within their housing stock and therefore residents of these communities are more likely to be exposed to the harmful health impacts that are associated with older housing. Other factors that can contribute to unsafe housing conditions include improper regulation and overcrowding. Prioritizing the safety and sanitation of housing stock within a community helps create proper living conditions for all residents, including those living in EJ communities.

In Figure 4, *Concern for Issues Related to Safe and Sanitary Homes in Glendale Results*, survey respondents indicated a high level of concern for “Affordability of or access to air conditioning or heating” (41%), followed by “None of the above” (30%), “Unsafe or unhealthy conditions in homes” (30%), “Overcrowding conditions in homes” (27%), and “Other” (18%). A summary of additional comments that correspond to the “Other” responses is provided on the following page and Table 1 includes the comments as received and categorized by theme.

ZIP Code Observations	
When comparing the topics by ZIP code, the results of each area are similar to the overall results of the City. A noticeable difference is the slightly higher rate of respondents who chose “None of the above” in western and northern ZIP codes, such as 91020, 91201, 91208, and 91214.	

Figure 4 – Concern for Issues Related to Safe and Sanitary Homes in Glendale

*such as lead, asbestos, mold, poor ventilation, pests and rodents, or needed repairs

Summary of Additional Comments Related To “Other” In Figure 4

Glendale residents feel that rising housing costs and the lack of rent control are making the City unaffordable, especially for low-income families. They express concerns about overcrowding in older buildings, inadequate shade and landscaping, and a lack of public amenities like public bathrooms and parking. High-density developments are perceived as adding to traffic, pollution, and infrastructure strain, while rising utility costs challenge residents' ability to maintain comfortable homes. Many are calling for tenant protections, improved amenities, and thoughtful planning to address these issues.

Table 1 – Additional comments related to “Other” in Figure 4

Themes	Comments
Housing Costs	• Very high rent and no rent control for landlords in Glendale • affordable housing • Rent to expensive • Affordability of rent in a clean environment is a huge problem • Affordability of rental properties and homes to buy in Glendale for first time homebuyers • Affordability of family and "workforce" housing • Lots of low income folks in Glendale can't afford the heightened cost of living so there's dilapidated buildings that are overcrowded with habitants
Environment	• Reasonable landscaping -trees for shade • Need for more trees, especially in S Glendale
Living Conditions	• No insulated windows in rental units • Only the amount of daily dust, allergens, and overall pollution, not to mention noise, produced by incessant leaf blowers operation. • Giant cockroaches showing up out of nowhere
Neighborhood Conditions	• Public bathroom especially at the parks • Lack of street parking- Burbank does better • Inadequate parking for family properties throughout a city without mass transit options • unmaintained landscaping - uncleared dead vegetation prone to fire hazard • Tenant protections • Neighbors burning varnished/painted wood and even plastic and rubber • Intrusion of busy-bodies, NIMBYS and Homeowner Associations imposing their minority standards upon the majority • Criminal activity in my building (drug dealers) which has become quite an obvious nuisance in Glendale in the past 5-7 years. • residents who smoke in multifamily properties
General Overcrowding	• Too many high rise apartment buildings with too many apartments putting too many people in too small spaces. • State mandated push to build more housing, thus making the city more crowded, slowing traffic which will increase air pollution, overburdening infrastructure such as electricity and water • Overcrowding in the city with too many condos being built
Utilities	• The power grid • Exacerbating public utilities. • Trash pickup by Athens is a disaster of high costs to condos • Energy costs are expensive in Glendale • I'm very concerned with the cost of electricity which may cause a problem for some people to have air conditioning during these very hot months • natural gas exhaust into homes from stoves and appliances • Utility rates are going up so much that it's becoming expensive to maintain a comfortable home. • The cost of running the air conditioner is outrageous

COOLING OFF ON HOT DAYS

In continuation of promoting safe and sanitary homes, survey respondents were asked where they go in Glendale if they need to cool off on hot days. In Figure 5, *Where Does the Glendale Community Go If They Need to Cool Off on Hot Days? Results*, 89% of respondents indicated that they have air conditioning at home to utilize, followed by 20% of respondents that go to private facilities, 18% go to public facilities, 9% go to another location, and 3% do not have a place to cool off on hot days. Table 2 on the following page includes additional comments, as received on the survey, related to the “Other location” response. Due to high energy costs, residents struggle to keep cool at home, often seeking relief in workspaces, friends’ homes, and public places. To manage, they rely on fans, limited AC use, and evening ventilation, while also visiting local pools and ice rinks.

ZIP Code Observations

When comparing the issue topics by ZIP code, the results of each area are similar to the overall results of the City. There were no noticeable differences to note in this report.

Figure 5 – Where Does the Glendale Community Go if They Need to Cool Off on Hot Days?

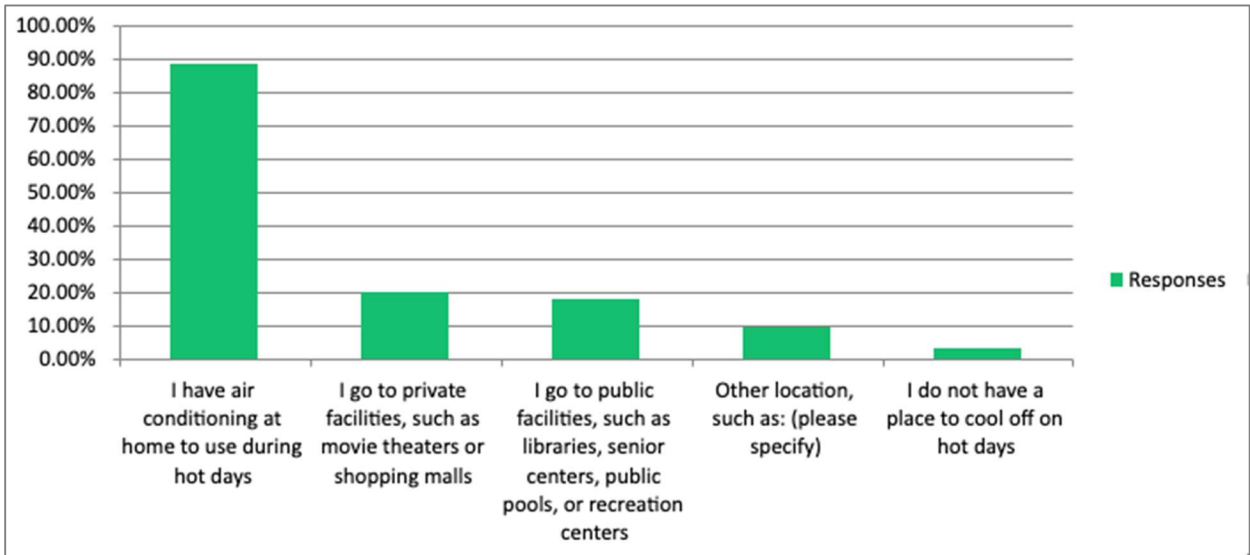

Table 2 - Additional comments related to “Other” in Figure 5

Themes	Additional Comments
Work	• Work has AC. • Work runs air conditioning during work hours.
Costs	• Energy costs are too high. • I can't afford to keep my home cool enough due to the price increases. So any place I can think of that won't cost me money in fuel or purchases by being a good customer for using their AC and taking up space. • The cost of running the air conditioner is outrageous • Rising cost of electricity is the problem
Home	• I open the house in the evening once it has cooled down and close up in the morning. Our house is very well insulated and holds the cool very well until late afternoon without a/c. • Take a cold shower, turn on the fan. • I have mobile AC unit at home. • Have to use regular fans to cool off at home since we can't afford increase in electricity bill • sit in front of box fan
Neighborhood Amenities	• pool in the apartment building where I live
Community	• Friends who have air conditioning
Specific places	• LA Kings Ice at Pickwick Gardens

WARMING UP ON COLD DAYS

Survey respondents were asked where in Glendale do they go if they need to warm up on cold days and 92% indicated that they have heating at home to use, 7% have “other locations,” and 4.5% do not have a place to warm up on cold days (Figure 6). Table 3 below includes additional comments, as received in the survey, related to the “other location” response. There were quite a few comments that indicated work as their place to find warmth. Other comments also suggested that it doesn’t get very cold in Southern California, so some may not need to use a heater.

ZIP Code Observations
When comparing the issue topics by ZIP code, the results of each area are similar to the overall results of the City. There were no noticeable differences to note in this report.

Figure 6 - Where Does the Glendale Community Go if They Need to Warm Up on Cold Days?

Table 3 - Additional Comments Related To “Other” In Figure 6

Themes	Additional Comments
Costs	• Energy costs are too high. • Rising cost of electricity is the problem
Work	• Office Building • Work runs heater during work hours.
Facilities	• Library • Public & private facilities
Other	• my car • I feel like Glendale doesn't really have this problem. The coldest it gets is like low 50s or maybe 40s but that's not even that bad.. with climate change I feel like this will be less of a problem, the Air con is going to be a hot topic • I wear layers of clothing. It isn't that cold in Southern California. • wear more clothes and use more blankets

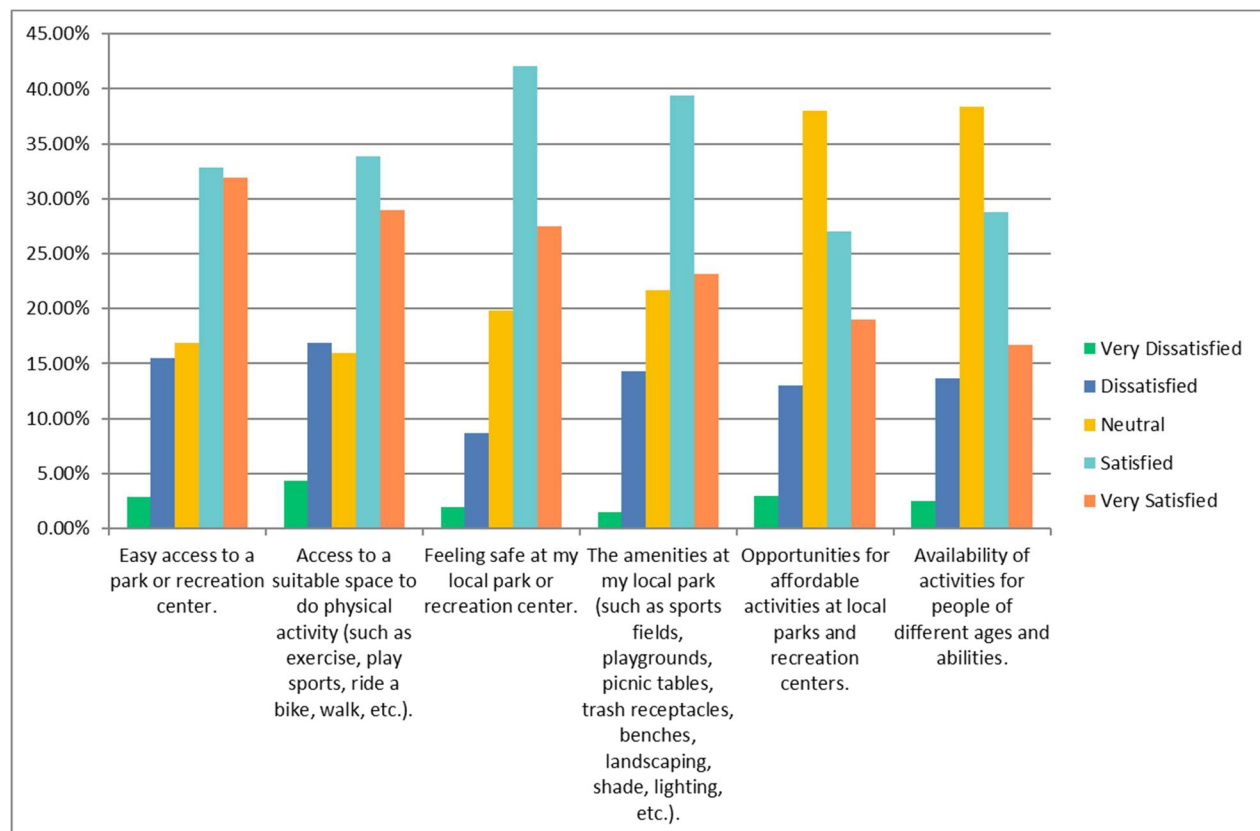

PROMOTE PHYSICAL ACTIVITY

Residents living in EJ communities are more likely to experience negative health outcomes due to fewer opportunities for formal and informal physical activity. Increasing the opportunity for physical activity within an EJ Community can positively impact the physical health of residents living in these areas. Increased physical activity levels are associated with a decreased risk for numerous health conditions and chronic illnesses.

In Figure 7, *Level of Satisfaction for Physical Activity Options in Glendale Results*, the highest levels of “Very Satisfied” categories were shown in “Easy access to a park or recreation center” (32%), followed by “Access to a suitable space to do physical activity” (29%), and “the amenities at my local park” (27.5%). “Opportunities for affordable activities at local parks and recreation centers” had a “Neutral” response from 38% of respondents, as well as the “Availability of activities for people of different ages and abilities.” The highest levels of dissatisfaction came from “Access to suitable space to do physical activity (4% Very Dissatisfied and 17% Dissatisfied).

ZIP Code Observations	
When comparing the physical activity topics by ZIP code, the results of each area are similar to the overall results of the City. There were no noticeable differences to note in this report.	

Figure 7 – Level of Satisfaction for Physical Activity Options in Glendale

REDUCE ANY UNIQUE OR COMPOUNDED HEALTH RISKS

Analyzing specific indicators that affect personal and communal health is important; but it is also essential to examine how each indicator affects one another, and how they combine to create unique health risks on both the individual and the community. Glendale does not have any notable unique situations which would significantly compound health risks.

In Figure 8, *Conditions that Might Affect Good Health and Quality of Life Results*, survey respondents were asked to indicate if any of the listed conditions in their neighborhood might affect good health and quality of life. Approximately two-thirds (63%) of respondents chose “Air pollution from vehicles on streets and freeways”, followed by 47.5% for “Illegal dumping of trash and other items in waterways or other areas”, 27% for “Air pollution from industrial businesses and activities”, and 27% for “Water pollution in waterways or storm drainage areas.” A summary of additional comments that correspond to the “Other” responses is provided on the following page and Table 4 includes the comments categorized by theme.

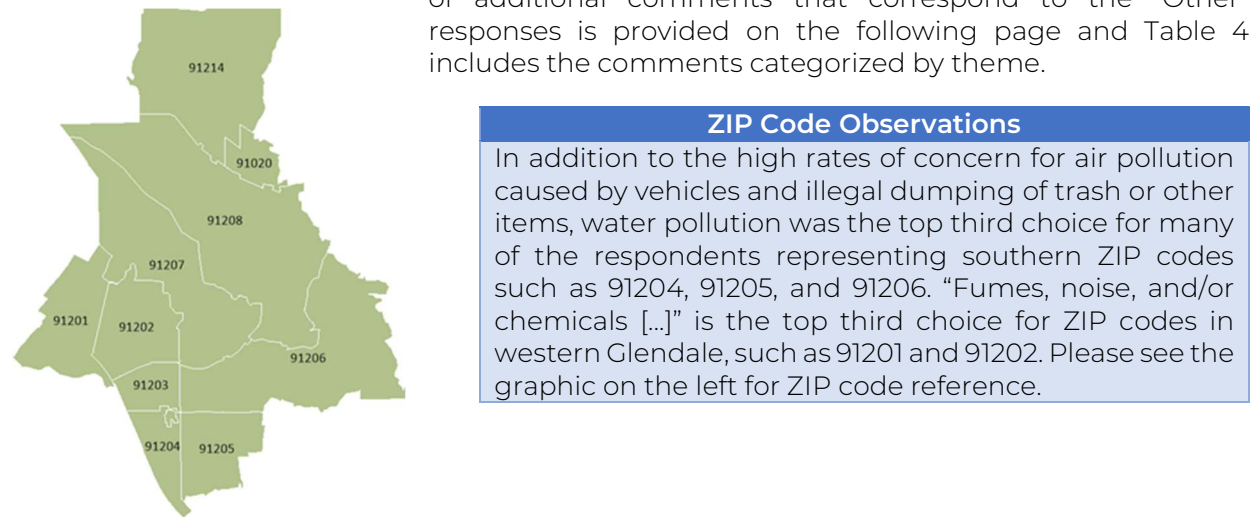

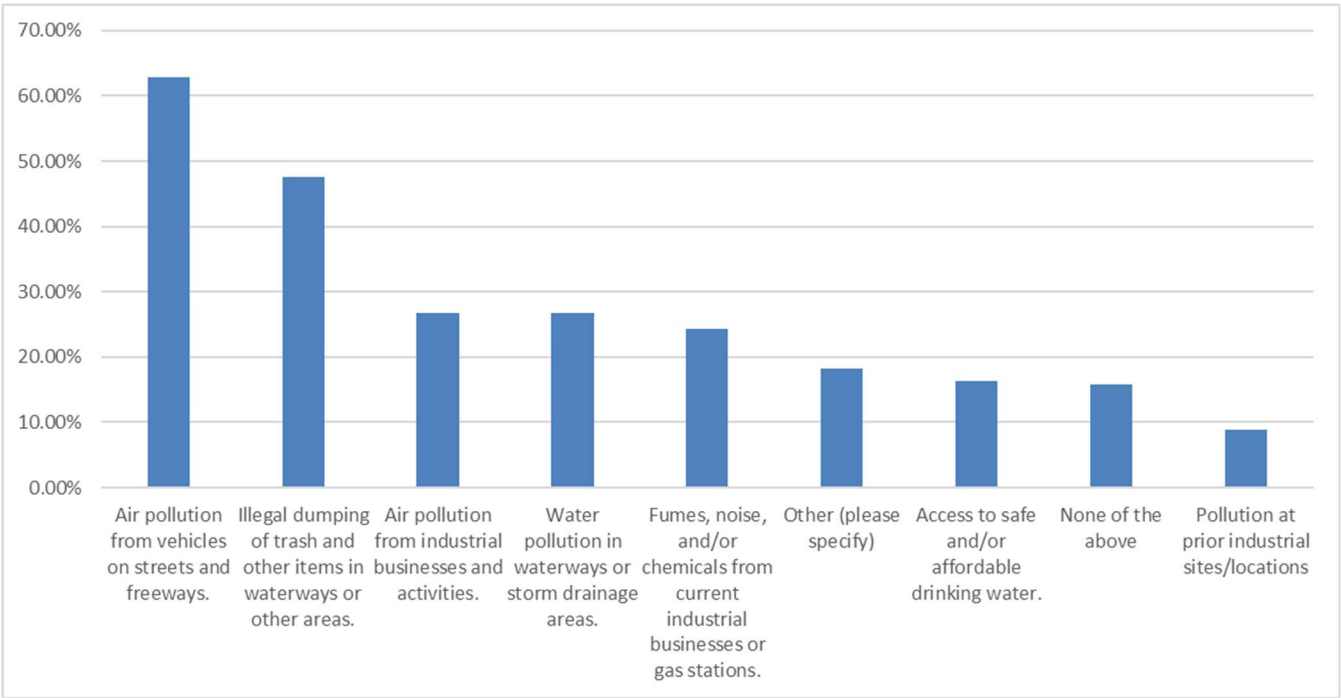

Figure 8 – Conditions That Might Affect Good Health and Quality of Life

Summary of Additional Comments Related To “Other” In Figure 4

Residents expressed frustration with constant noise and pollution from freeway traffic, modified vehicles, leaf blowers, and DMV driving tests. Concerns also center on increased crime, illegal marijuana grow houses, and insufficient police enforcement of dangerous driving, with many feeling that high neighborhood speed limits pose safety risks. Residents are dissatisfied by limited shade canopies, poor vegetation barriers, and neglected litter removal, particularly along the 134 freeway and Verdugo Road, which they believe contribute to a deteriorating environment. They also expressed a need for traffic mitigation associated with new development, improved City coordination on trash cleanup, and better water filtration technology.

Table 4 - Additional Comments Related To “Other” In Figure 8

Themes	Additional Comments
Air Pollution	- DMV has driving schools and DMV testers constantly parking by my house to do backups and often cars will sit with engines running causing extra pollution by my house and this goes on everyday and holidays. This has been going on for years and I am sick of it. - particulate matter from fireplace fires - Cigarette smoking is prevalent in Glendale - Leaf blowers and fake “grass” are toxic to the environment
Community	- no more “development” - traffic in Glendale is outrageous - Illegal Marijuana grow houses in our neighborhood - gang problems and crime
Landscaping	Lack of tree shade canopies and vegetation barriers.
Noise	- Excessive noise from freeways, modified vehicles and illegal fireworks. - Noise pollution from traffic, sirens, helicopters, etc - Construction noise, commercial and residential - Noise and smoke from train line on San Fernando - pollution from gardening equipment, Noise and air pollution from generator at Milford and Maryland. - Car and motorcycle noises - Noise and air pollution from gas powered yard maintenance equipment. - Loud gas leaf blowers - The railroad is not a good neighbor!
Street Safety	- Lack of Police enforcement of dangerous drivers - injurious & possibly fatal - The speed limit in my neighborhood is very high and dangerous
Waste	- The city needs to better coordinate with CalTrans to remove trash along the 134 just outside the sound walls. For example around Doran & Naranja - Businesses not cleaning sidewalk & curbs - a lot of trash in los angeles river - Litter and cigarette butts - Illegal dumping of used furniture in front of apartment buildings - Junk accumulating on sidewalks and city strip - I have noticed an increase in dumped trash and more graffiti in my neighborhood. - Cigarette smoke in public parks and citywide - Verdugo road right above Glenoaks is a giant trash dump—really disgusting - People not picking up dog poo
Water Pollution	New technology for filtration of city water is necessary

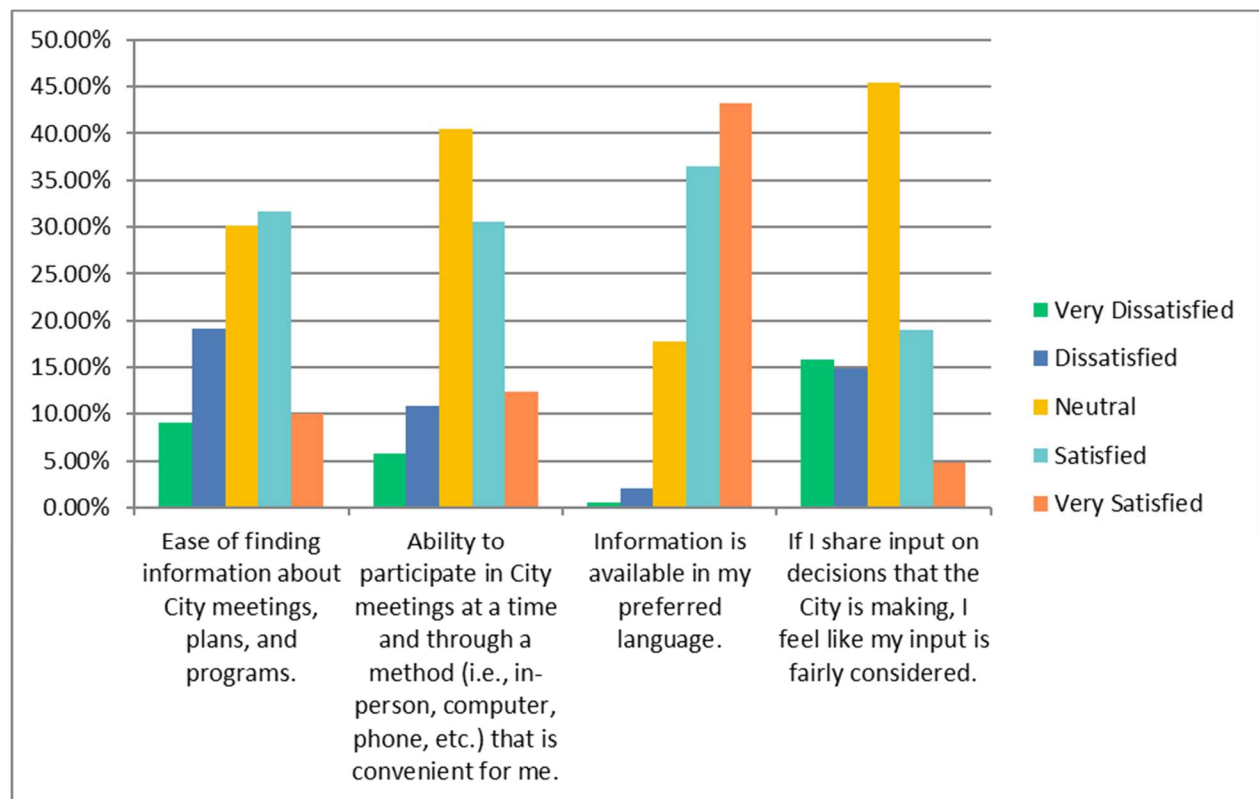

PROMOTE CIVIC ENGAGEMENT IN THE PUBLIC DECISION-MAKING PROCESS

An important aspect of EJ is the development of effective policies and programs that enable all residents to participate in local decision making. SB 1000 emphasizes that community engagement must be promoted in a local jurisdiction through the development of objectives and policies that seek to specifically involve residents of DACs. By engaging EJ communities in decision-making processes, policymakers can more effectively meet the needs of these community members. EJ communities often have culturally specific needs, distinct from those of the general population. The U.S. EPA EJ Policy requires the “...meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.”

In Figure 9, *Level of Satisfaction Regarding Community Engagement Results*, a large portion of survey respondents indicated that they are “Very Satisfied” that “Information is available in my preferred language” (43%). Respondents are generally mixed between “Neutral” and “Satisfied” amongst all categories. Higher levels of dissatisfaction are seen in categories like “If I share input on decisions that the City is making, I feel like my input is fairly considered” (16% Very Dissatisfied, 15% Dissatisfied) and “Ease of finding information about City meetings, plans, and programs” (9% Very Dissatisfied, 19% Dissatisfied).

ZIP Code Observations	
When comparing the community engagement topics by ZIP code, the results of each area are similar to the overall results of the City. One notable difference is that a high portion of respondents from ZIP code 91214 (northern Glendale) indicated that they were very dissatisfied with the option, “If I share input on decisions that the City is making, I feel like my input is fairly considered.”	

Figure 9 – Level of Satisfaction Regarding Community Engagement in Glendale

ADDITIONAL COMMENTS ABOUT EJ FROM SURVEY RESPONDENTS

Summary of Additional Comments Provided By Survey Respondents

Residents expressed concerns about illegal dumping, pedestrian and bicycle safety, and the need for more public amenities. They advocate for community food gardens, exercise programs, and more electric vehicle charging stations, as well as increased access to mental health services for vulnerable populations. Noise pollution from helicopters and gas leaf blowers raises concerns, leading to suggestions for sound barriers and educational initiatives. There is strong demand for more green space, better street safety, and improved neighborhood connectivity. Residents emphasize the need for inclusive City surveys, financial incentives for solar energy, proper waste management education, and active community involvement in environmental justice efforts to enhance livability in Glendale.

Table 5 includes all comments categorized into themes, which include Community, Noise, Parks, Pollution, Streets, Survey, Utilities, and Waste. There was a diverse set of comments and ideas, suggesting that there is more to be discussed about EJ efforts in Glendale.

Table 5 – Summary of Additional Comments About EJ From Respondents

Themes	Comments
Community	- Concerns regarding dumping in areas that affects neighbors and the community - Increase pedestrian and bicycle safety - Develop community food gardens - Develop community programs, such as exercise classes - Expanding our public facilities and amenities - Keep Grayson open - Incorporate inclusive design - Awareness and education on reducing carbon footprints and mitigating climate change. - Increasing the amount of electric vehicle charging stations - Increasing amount of filtered drinking water fountains - Need for more public restrooms - Planting more trees - The communities in South Glendale would benefit from EJ efforts - The most vulnerable population who needs to have access to services (especially mental health services) doesn't have information on where to go and who to go to. It would be great to do PSAs in different languages to connect the community with resources and services in our community. Moreover, to help them navigate the various systems they may be in need of. - Those most affected by these issues may require other methods of engagement, e.g. schools, churches, leaders, word of mouth, etc. - Community organizations that are interested in contributing to EJ efforts and participate in more city initiatives - Tackling invasive species in the city - Several years ago, the City's Neighborhood Services Department researched and compiled a report documenting various indicators for Quality of Life in Glendale. All of the topics included in this survey were a part of that effort, as well as many more. This report was adopted by the City Council and could serve as a foundation for a more comprehensive

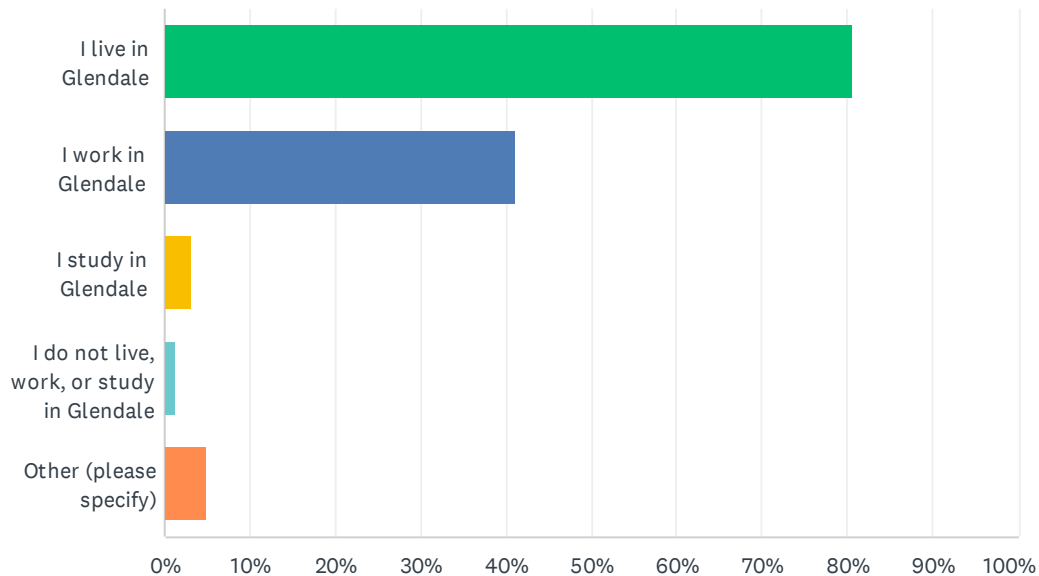

Themes	Comments
	effort, for all residents, involving many more elements that contribute to the livability of our city. • More mixed use zoning in the neighborhood so people can have stores and shops within walking distance of where they live
Noise	• Idea of installing curved translucent sound barriers along train tracks to reduce noise pollution. • Complaints regarding noise pollution from helicopters in the middle of the night.
Parks	• Develop more pocket parks • Increase shade at existing Glendale parks, especially over children's play structures and swings. • Most apartment communities have no play areas, and available parks are not within a short distance. • Lack of greenspace in South Glendale • Idea of opening GHS to the public on weeknights • Need of open space in underserved areas of Glendale
Pollution	• Concern for gas leaf blower exhaust and fumes in the Verdugo Woodlands. Advise to educate residents about the harm from gas leaf blowers • Reduce greenhouse gas emissions • Concern for large amount of cigarette smoking in residential areas and improper disposal of cigarette buds.
Streets	• Increase street safety and law enforcement measures. • No noticeable change to pedestrian safety despite budget allocation. • Concern for roadways in school zones • Unsure why some bike/pedestrian bridges are not accessible, such as the Naranja and Doran entryways. • Lack of neighborhood connectivity in North Glendale. • Lowell Avenue is too crowded in Crescenta Highlands. • Drivers are not considerate of pedestrians • Traffic conditions on Windsor Rd between Chevy chase and Glendale blvd are dangerous, traffic drives through at high speeds with little caution to pedestrians. • Elimination of car lanes leads to more traffic. • Little use of bike lanes • Need for wider streets • Increase in bus and bike lanes • Increase in trees along sidewalks • Residential streets, like Louise, are being used as thoroughfares to bypass Brand and Central. • Please also consider keeping the Verdugo Channel day-lit as part of the bikepath remodel. This would not only help circulate and cool the air in the surrounding areas, but would also create/restore habitat for the abundant wildlife in the area. • Suggest to take inspiration from Burbank, who has converted certain streets to one way traffic. • More parking in apartment communities
Survey	• Ensuring that city surveys like these are accessible to disadvantaged communities • This survey has increased interest and awareness of the EJ Element

Themes	Comments
	• I don't believe this is a representative survey as the areas selected are basically a representation of population and not "disadvantaged" for any other reason • This survey was too short and too general. It doesn't reflect the competing pressures primarily those from state mandates to increase housing and the preferences of long time residents for quiet, peaceful, uncrowded neighborhoods with reasonable commuting times and relatively good air quality.
Utilities	• Needed financial assistance and incentives to transition to solar energy • Increase solar panels in commercial parking lots to provide shade and a sustainable source of energy. • Concern for the rising cost of energy
Waste	• City needs to be proactive on illegal dumping • Lack of proper education and participation of the community in regard to recycling, trash, and compost collection • Concern for businesses that use toxic chemicals along San Fernando Road • Concern for dumping of furniture and trash on curbs and streets • Would like to have compost bins in apartment communities

Q4 We want to know if there are any additional areas in the City beyond those shown in the map that deserve special attention to address issues of environmental justice. Please describe the area to the best of your ability using neighborhood references, cross streets, landmarks, or other descriptors, and also provide details about why this area needs special attention.

Answered: 37 Skipped: 211

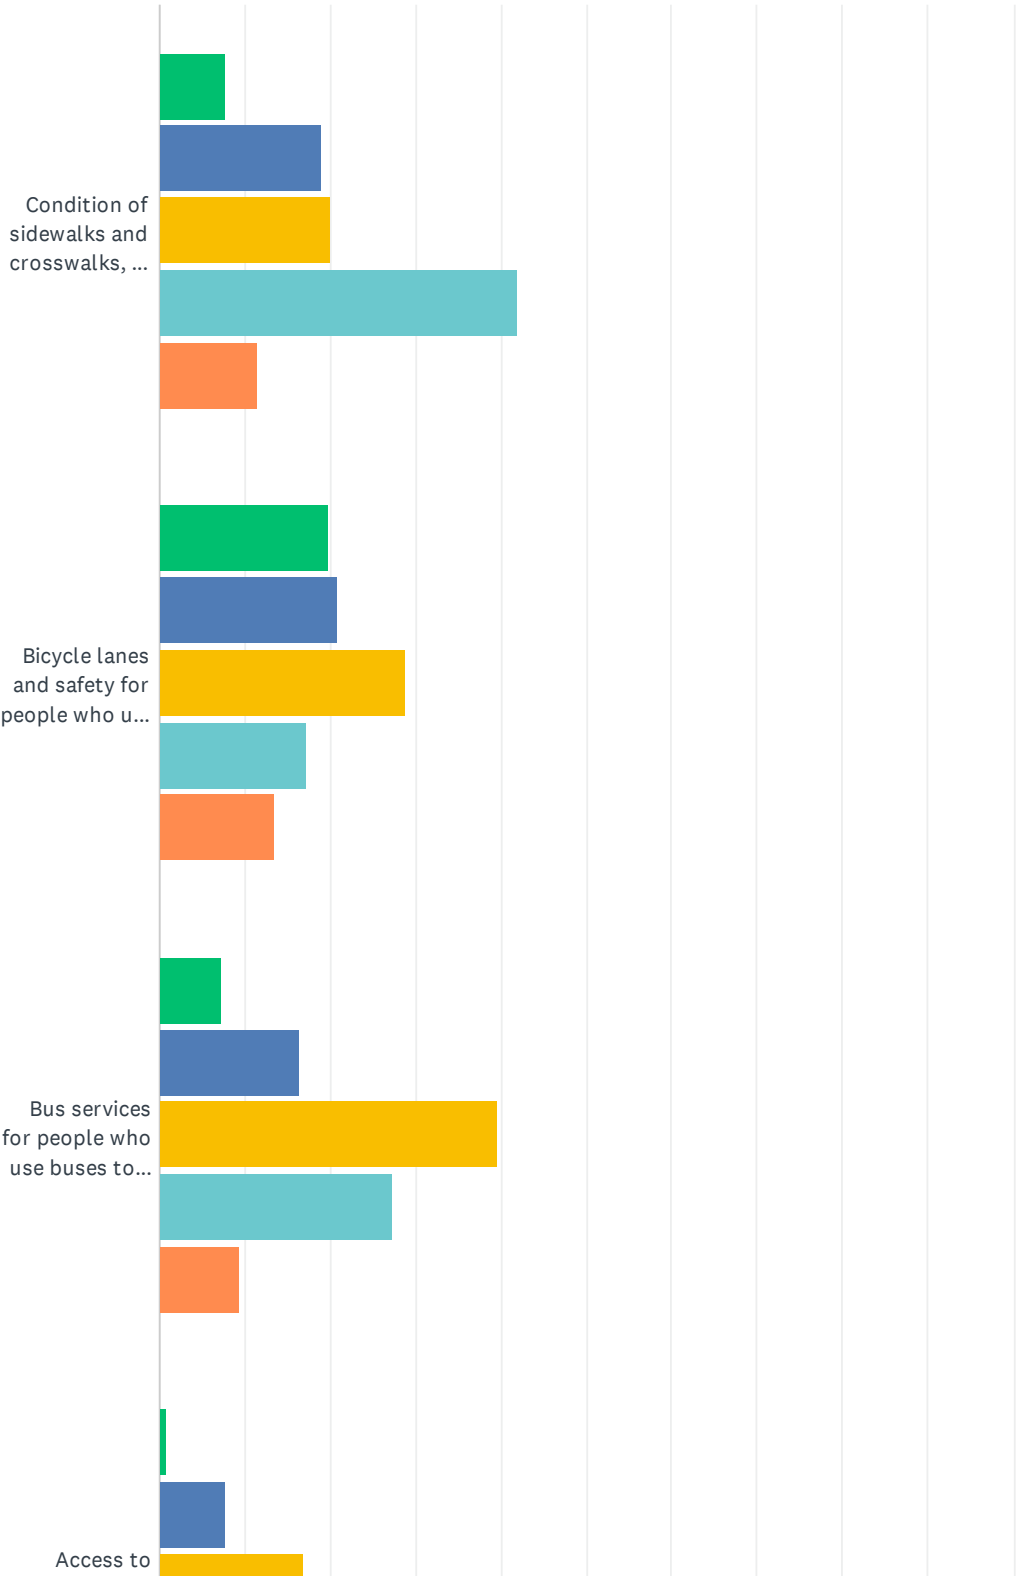

#	RESPONSES	DATE
1	None need "environmental justice". The city should leave our neighborhoods alone .	8/20/2024 7:22 PM
2	I think it's important to recognize there is a big difference between the disadvantaged communities you've identified. Specifically, the areas closest to the rail line on N San Fernando are in a heavily industrial area. A couple years ago one of these buildings had a major chemical gas leak. This problem should probably be prioritized over car pollution in the downtown area, for instance.	8/17/2024 4:23 PM
3	The area of the verdugo wash has become an area that needs special attention because of the proliferation of gang activity, unhoused people, and consequence of not being able to use it for recreation safely.	8/17/2024 12:38 PM
4	Verdugo City. Our park/green space access by anything other than a car is limited by wide, high speed roads and incomplete/ non-existent sidewalk network. Trees on main roads for shade also very limited. We have a lot of apartments in the area, so it's denser than surrounding neighborhoods. Cross walks or safe connectors to CV park and other neighborhoods would go a long way. We need trees for shade.	8/17/2024 5:34 AM
5	All of Glendale. GWP water treatment needs to do a better job in filtering out PFAS in water and higher levels of toxic Hexavalent chromium. There is no reason that this cannot be filtered out almost entirely.	8/16/2024 11:25 PM
6	n/a	8/14/2024 4:45 PM
7	x	8/9/2024 2:27 PM
8	This looks pretty accurate to me. The hillside communities including Kenneth village area and La crescenta / montrose regions are pretty affluent compared to the areas of Glendale closer to down town, and they exhibit less smog than the disadvantaged regions you highlighted green	8/7/2024 10:45 PM
9	There are low income families in apartments in the foothills by La Crescenta.	7/31/2024 5:20 PM
10	not at this time.	7/30/2024 4:46 PM
11	All areas should have access to environmental justice.	7/29/2024 8:58 PM
12	Side walks need plants that are pollinators to help the environment and bee's. Trees should not be cut down.	7/29/2024 11:45 AM
13	My area is experiencing an uptick in homelessness and street food vendors without permits.	7/29/2024 7:51 AM
14	I don't know any other areas	7/28/2024 11:41 AM
15	The Verdugo woodlands is at higher risk of wildfire damage than the areas you've highlighted.	7/28/2024 10:53 AM
16	Not sure	7/27/2024 6:29 PM
17	I live in the green area—better connects to the river	7/27/2024 9:56 AM
18	I don't know about environmental justice, I know Glendale has been deteriorating rapidly over	7/26/2024 6:00 PM

City of Glendale Environmental Justice Survey

	the last few years for all residents.	
19	n/a. This map accurately reflects where the highest needs are.	7/22/2024 9:38 AM
20	Special attention should be taken in areas within 1 mile of the Grayson Power Plant. Also all areas surrounding large parking lots. Areas near artificial turf are also impacted with excess heat and pollutants.	7/22/2024 8:49 AM
21	none	6/13/2024 12:36 PM
22	Yes.... All the R H zoned lots for HORSES !!	6/13/2024 10:14 AM
23	The city is perfect as is. Safe and clean	6/11/2024 11:27 AM
24	First you need to define "environmental justice." I believe the entire city is entitled to environmental justice but that it means different things to different neighborhoods. In south Glendale it means more parks and open space. In canyons and near woodlands it means better fire protection. Near freeways it means filters to clean the air.	5/24/2024 4:35 PM
25	Glendale in general	5/22/2024 1:50 PM
26	None.	5/21/2024 11:10 AM
27	I think the whole city should be looked at especially in terms of access/transportation.	5/21/2024 9:34 AM
28	none. just the identified areas	5/21/2024 7:45 AM
29	Area near the 210 freeway, both north/south of the 210 freeway around pennsylvania.	5/21/2024 6:48 AM
30	The Woodbury neighborhood should also be considered. It sits at the junction of the 134 and 2 freeways, as well as	5/21/2024 12:26 AM
31	San Fernando Rd, Colorado trash, illegal dumping, crime	5/20/2024 5:00 PM

ANSWER CHOICES	RESPONSES	
None of the above	15.84%	32
Air pollution from vehicles on streets and freeways.	62.87%	127
Air pollution from industrial businesses and activities.	26.73%	54
Water pollution in waterways or storm drainage areas.	26.73%	54
Access to safe and/or affordable drinking water.	16.34%	33
Fumes, noise, and/or chemicals from current industrial businesses or gas stations.	24.26%	49
Pollution at prior industrial sites/locations	8.91%	18
Illegal dumping of trash and other items in waterways or other areas.	47.52%	96
Other (please specify)	18.32%	37
Total Respondents: 202		

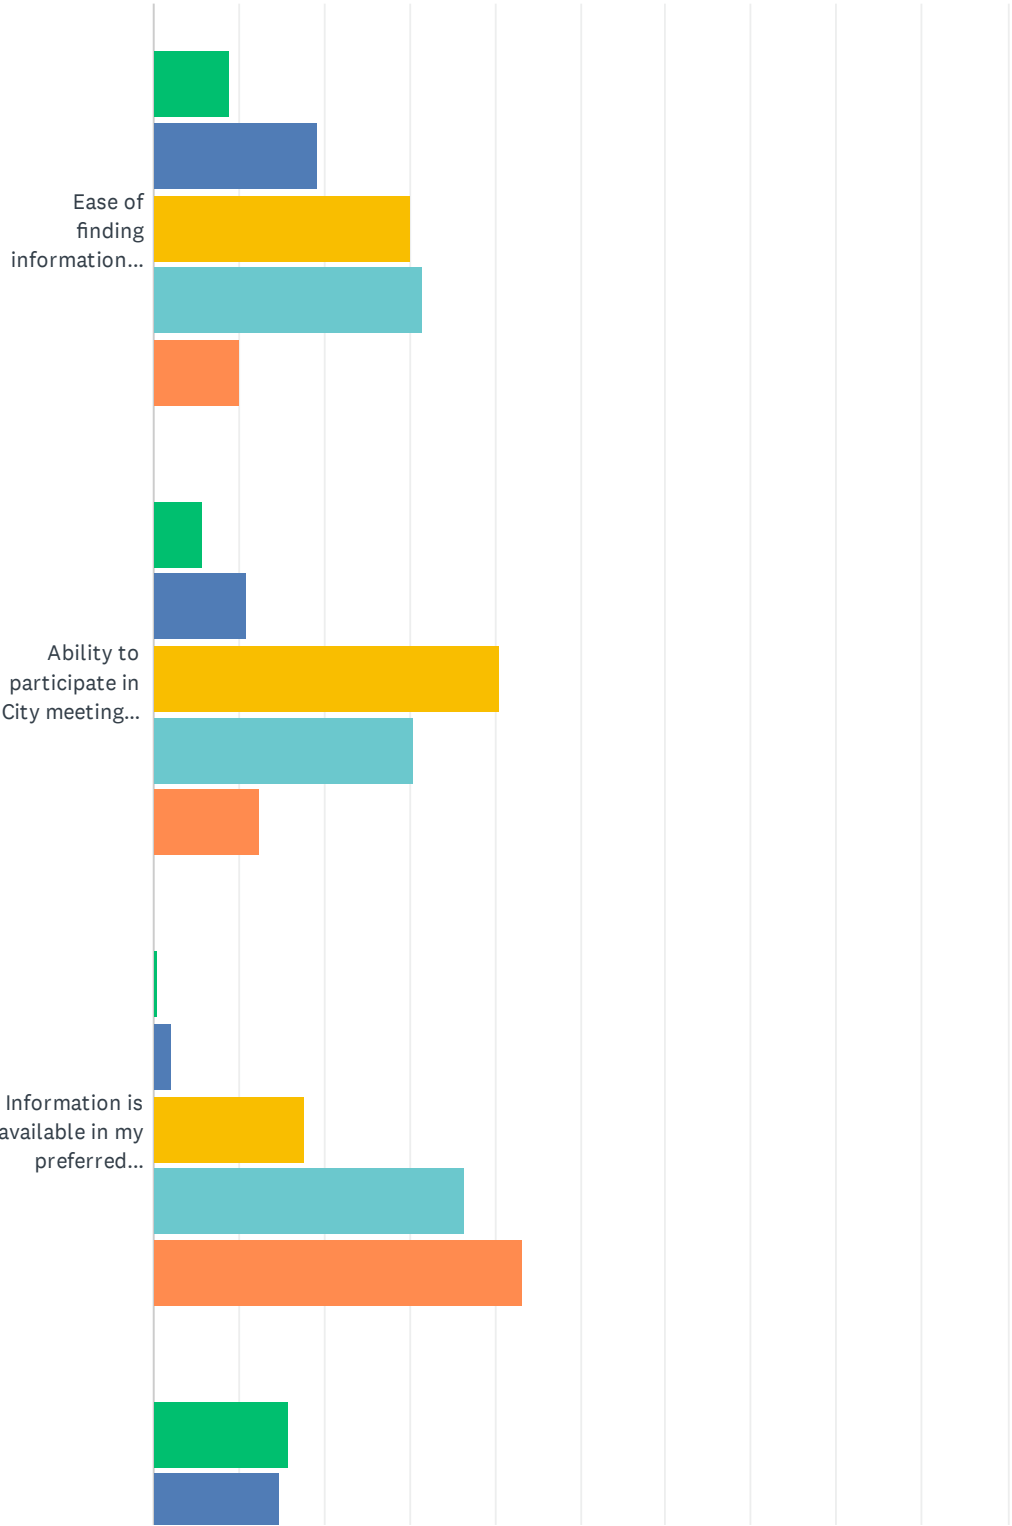

#	OTHER (PLEASE SPECIFY)	DATE
1	Lack of Police enforcement of dangerous drivers - injurious & possibly fatal	8/25/2024 5:28 PM
2	The city needs to better coordinate with CalTrans to remove trash along the 134 just outside the sound walls. For example around Doran & Naranja	8/21/2024 9:00 PM
3	Businesses not cleaning sidewalk & curbs	8/18/2024 4:07 PM
4	a lot of trash in los angeles river	8/17/2024 4:28 PM
5	Noise pollution from speeding and radios from cars and parties late at night	8/17/2024 12:44 PM
6	DMV has driving schools and DMV testers constantly parking by my house to do backups and often cars will sit with engines running causing extra pollution by my house and this goes on everyday and holidays. This has been going on for years and I am sick of it.	8/15/2024 11:04 PM
7	Excessive noise from freeways, modified vehicles and illegal fireworks.	8/15/2024 5:14 PM
8	Litter and cigarette butts	8/15/2024 4:42 PM
9	particulate matter from fireplace fires	8/15/2024 2:01 PM
10	Illegal dumping of bulky items ALL OVER the city. These don't decompose very well, are an eye sore, and are a nuisance to the community. People need a free and easy way to dispose of bulky items without getting in the habit of throwing it in the median 🧑	8/7/2024 10:54 PM
11	Leaf blowers and fake "grass" are toxic to the environment	8/5/2024 12:20 PM
12	Illegal dumping of used furniture in front of apartment buildings	8/5/2024 8:57 AM
13	Junk Accumulating on sidewalks and city strip	8/4/2024 8:52 AM
14	the waste (compost, trash, recylcables) in our building and at eateries all end up in the same trash truck. I have pictures to prove it. I spoke to management multiple times of our apartment building and several eateries. Nothing is being done by the waste companies.	8/3/2024 6:50 PM
15	Noise pollution from traffic, sirens, helicopters, etc	7/29/2024 4:38 PM
16	I have noticed an increase in dumped trash and more graffiti in my neighborhood.	7/29/2024 8:05 AM
17	Construction noise, commercial and residential	7/28/2024 7:46 AM
18	Cigarette smoke in public parks and citywide	7/27/2024 9:21 PM
19	NO MORE "DEVDELOPMENT" - TRAFFIC IN GLENDALE IS OUTRAGEOUS	7/27/2024 1:04 PM
20	The railroad is not a good neighbor!	7/27/2024 10:00 AM

City of Glendale Environmental Justice Survey

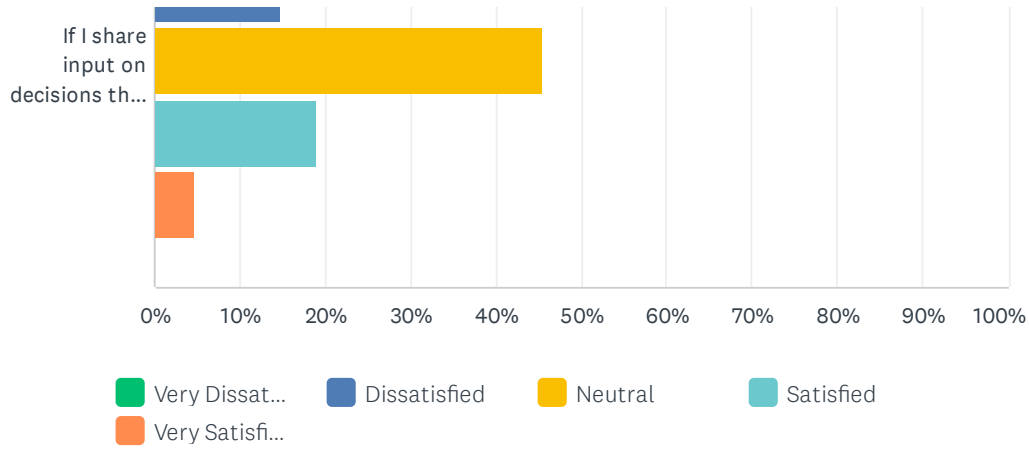

21	Noise and smoke from train line on San Fernando	7/26/2024 11:58 PM
22	As mentioned, leaf blowers pollution.	7/26/2024 6:06 PM
23	Cigarette smoking is prevalent in Glendale despite your signs stating "Glendale Fresh Air". And why does the Phoenicia Restaurant get away with cigarette and cigar smoking on their patio? I have to smell that every time I walk by it. Who got paid off to allow this?	7/26/2024 1:51 PM
24	Include gardeners with leaf/dust blowers. There are many days when you want to leave your windows open for ventilation....but with weekly visits by gardeners serving many different adjacent addresses on different days and times it becomes a chore to have to remember to close windows to prevent the infiltration of dust, odors and noise!	7/26/2024 1:35 PM
25	pollution from gardening equipment, Noise and air pollution from generator at Milford and Maryland.	7/22/2024 8:54 AM
26	Car and motorcycle noises	7/20/2024 11:33 PM
27	Batteries being stored / Lithium is hazardous / @ 1847 Victory Blvd by owner	6/13/2024 10:18 AM
28	Littering and many many cigarette butts	5/24/2024 8:51 AM
29	Noise and air pollution from gas powered yard maintenance equipment.	5/23/2024 9:04 AM
30	New technology for filtration of city water is necessary	5/22/2024 1:57 PM
31	Verdugo road right above Glenoaks is a giant trash dump—really disgusting	5/21/2024 10:45 AM
32	The speed limit in my neighborhood is very high and dangerous	5/21/2024 9:38 AM
33	Illegal Marijuana grow houses in our neighborhood	5/21/2024 6:50 AM
34	Very very very loud gas leaf blowers	5/20/2024 4:38 PM

Answered: 91 Skipped: 157

#	RESPONSES	DATE
1	Streets get dirty by homeless , but Do not get cleaned or hosed down to get rid of the germs or stains, making it disgusting to walk around the block with a baby stroller	9/2/2024 2:39 PM
2	My main request is for the city to step up law enforcement of bad drivers for whom stop signs and speed limits are meaningless. This is a hazard to me, families, pets, deer, etc. in the 91202. A short observation of any cross streets on Cumberland would inform the city of this. It starts with issues like this and grows as scofflaws become empowered.	8/25/2024 5:32 PM
3	There was a budget for improving pedestrian safety... Have not noticed any major improvements. Especially in roadways surrounding our schools.	8/24/2024 10:38 PM
4	I'm a cyclist and I can't understand why the bike/pedestrian bridge at Naranja and Doran over the 234 is forever locked. The bridge at Columbus is open, the tunnel at Kenniworth is open. Why not Doren?.....	8/21/2024 9:09 PM
5	Gas leaf blower exhaust and fumes are exceptionally bad in Verdugo Woodlands. Residents need to be educated about how detrimental gas leaf blowers are to human and animal well-being.	8/20/2024 8:29 PM
6	Leave our wonderful neighborhoods alone. Stop pushing Democratic Party policies and agenda in neighborhoods that don't want or need extra government interference.	8/20/2024 7:28 PM
7	Stop calling it "environmental justice." It's divisive and not accurate. Call it "Community Experience and Interface for All"	8/20/2024 2:28 PM
8	City needs to be proactive on illegal dumping. Advertise in paper and on Nextdoor regarding use of electric landscaping equipment	8/18/2024 4:10 PM
9	Tackling the urban heat island effect is extremely important to prevent heat related illness. Tree canopy is needed in streets with no shade and areas of high traffic. More Community gardens are needed that are accessible to all neighborhoods. More effort into community engagement/communications for all languages so that everyone understands and can participate. How can Glendale utilize its resources to prioritize EJ and its different cultural communities when it comes to education, communication, engagement, and empowerment. How is Glendale fostering community leadership through this EJ initiative?	8/18/2024 12:56 AM
10	I've been a Glendale residents for a few years now. I'm unsure about the environmental concerns, other than living near a freeway. I signed up because I'm curious what concerns EJ is trying to address.	8/17/2024 5:32 PM
11	The cost of electricity is going insane.	8/17/2024 4:30 PM
12	Remember that not everybody can afford the current GWP rates. In the past month, I've received a handful of notices to " watch my gwp video!" On this that or the other thing. Then I received my bill, and it is 150% of my prior two muns Bill . This is despite keeping my thermostat at 78° or higher, June was epically cooler than usual so the AC never ran at night; and I've already participated in at least three rush hours.	8/17/2024 1:00 PM
13	It's a great city if you leave it alone.	8/17/2024 12:17 PM
14	Currently, I cannot afford a new roof, much less install solar panels. What is the city doing to assist me in going solar?	8/17/2024 11:47 AM
15	Please take a hard look a neighborhood connectedness in terms of walking the north most part of Glendale. You'll find it lacking - sidewalks limited, cross walks, shade, safe bike routes.	8/17/2024 5:40 AM
16	Please provide cleaner drinking water. Please speed up permitting and inspections of	8/16/2024 11:37 PM

City of Glendale Environmental Justice Survey

residential solar installations.

17	Street on Lowell Ave is too crowded in Cresenta Highlands. Glendale ignores their own regulations to favor private schools and developers. There is racial bias at the city level which needs to be addressed.	8/16/2024 11:25 PM
18	Several years ago, the City's Neighborhood Services Department researched and compiled a report documenting various indicators for Quality of Life in Glendale. All of the topics included in this survey were a part of that effort, as well as many more. This report was adopted by the city Council and could serve as a foundation for a more comprehensive effort, for all residents, involving many more elements that contribute to the liveability of our city.	8/15/2024 5:23 PM
19	I am the founder of Bridging the Borders, an Armenian social justice organization based in Glendale that focuses on indigenous Armenian issues and fostering solidarity. Environmental justice is a significant component of our mission and has been a personal passion of mine since childhood. During my time as Environmental Club President at Glendale Community College (GCC), I initiated the campus-wide smoking ban in 2009/2010, which eventually contributed to the broader smoking ban across all of Glendale. Additionally, I was actively involved in the Go Green Glendale initiatives to ban plastic bags citywide. I am eager to collaborate with your team and explore how Bridging the Borders can further contribute to environmental justice efforts. Our organization is primarily active on Instagram @BridgingtheBorders.	8/15/2024 4:49 PM
20	Need more small pocket parks parks scattered throughout the community. Need to infill missing sidewalks on blocks of residential streets to encourage walking.	8/15/2024 4:45 PM
21	Grayson was built in the poor part of town and now you are going to rebuild it with gas power. Give everyone in the area around it solar panels.	8/15/2024 2:04 PM
22	There are invasive species overtaking many waterways and hillsides in Chevy Chase and other areas of wildland in Glendale. I'm surprised we are not aggressively targeting Arundo Donax (giant reed) before it takes over the stream alongside Linda Vista, the headwaters of a stream on Figueroa, and the small streams along the dirt portion of Greenwich Road. That stuff takes over if you don't poison it and will clog up our natural waterways and displace native species essential for native animals and insects. Also, there's lots of tree tobacco all of a sudden these last 5-6 years on the hillsides. Hummingbirds like it but otherwise it is useless and crowds out natives. Can we not make an effort as a city to stop these? Arundo donax requires poisoning to kill it. Let's at least stop those who use the Arundo Donax in their gardens. (See, for example: https://maps.app.goo.gl/7sh4Q8tM6n81gb9J6) Finally, I do not understand why more commercial parking lots don't have solar panels shading the cars. This is a win-win-win. Let's incentive businesses to do it and thereby reduce our need to burn natural gas.	8/8/2024 12:31 PM
23	You've covered a great range of topics thank you! I believe we need more community than ever rather than individualism. the latter is what leads people to dumping in areas they think doesn't effect them but hurts their neighbor. Crazy drivers not paying mind to pedestrians / bicyclists. Businesses polluting the air or waters bc it doesn't effect their bottom line. All these just as examples. We need more community building as Glendale boasts some really cool features like we've got tons of clean beautiful parks we should capitalize on community building through classes like for exercise or community gardening maybe even public vegetable/fruit botanical gardens, we've got great libraries and some pretty cool museums we could definitely do more community building through public works like these, expanding these programs. Community building through events like how city of LA has cicla via. I think we've got a particular edge over LA in that were smaller, more tight nit, so we can do things at a much more hyper local level that would take LA much longer to implement. Like how we are quickly revitalizing our parks (I live steps away from Fremont park and so excited for what's to come). Please help us build community because this is what we need in the future fight against climate catastrophe and individualism reigning supreme.	8/7/2024 11:04 PM
24	The number of cars that drive incredibly fast and don't respect pedestrian safety is out of control.	8/7/2024 12:14 PM
25	We use Glendale parks regularly with our kids. I would strongly support any efforts to increase shade at Glendale parks, especially over the play structures and swings, etc. The parks are amazing but many of them need more shade. Thank you!	8/6/2024 9:02 PM
26	Artificial Turf of all kinds are bad for the ecosystem, known to have cancer-causing properties	8/5/2024 12:29 PM

City of Glendale Environmental Justice Survey

and heat up the environment. Vinyl fencing is also horrible for the environment. Leaf blowers (electric or gas) are bad for healthy ecosystems. But the gas blowers are the worst on so many levels.

27	Glendale needs at least one park in the southern area and preferably more. There need to be more Beeline buses that run in other areas. The need for bike lanes is vastly overstated; installing them would not only cost an exorbitant amount but would actually increase air pollution by forcing cars and trucks to spend more time idling at traffic signals.	8/5/2024 9:01 AM
28	Most families in South Glendale live in apartment buildings with no play areas and most do not have parks within a 15-minute walk.	8/4/2024 10:31 PM
29	We need more parking in areas with a lot of apartments. My street is mostly red and it does not make sense. We also need programs to assist first time homebuyers. Also more assistance for people trying to turn their lawns into drought resistant terrain.	8/4/2024 7:36 PM
30	Keep Grayson open	8/4/2024 4:03 PM
31	Please lower energy prices, I can't afford it and feeding my family	8/4/2024 8:55 AM
32	I am VERY concerned about the lack of recycling, trash, and compost collection: the lack of proper education and participation of the community AND of the waste collecting companies. People throw away perfectly find items into the trash bins instead of giving them to Goodwill for example. Because every recycling container also contains trash, the waste companies dump the recycling in with the trash truck. Very few apartments separate compost+cardboard from their trash. The In-and-out restaurant on Brand and all other eateries throw all of their customer sided waste collection into one trash bin. It is terribly irresponsible. I called and emailed the sustainability office, and the city multiple times, but nothing has been done about it. My engagement is not wanted.	8/3/2024 6:58 PM
33	There is a significant lack of green space in south Glendale. The GCC Garfield Campus has a massive field that is currently sitting unused behind an iron fence. Why doesn't that get turned into a public park? GHS could also be opened up to the public on weeknights. I'm not sure if Adams Hill is "disadvantaged" anymore. Most of those houses are 1.5 million dollars or more.	7/31/2024 5:29 PM
34	Glendale is becoming a concrete jungle. Way too many MEGA BUILDINGS , buildings with more than 50 units, are built in downtown Glendale. No Open Space Anymore. Too many Cars and People are causing Air, Noise and Mental Health Pollution, not to mention pedestrian endangerment and heavy traffic and gridlock. Also cycling in the city is too dangerous, the roads are already overcrowded with moving and parked cars, so allowing bikes to use the entire lane, like if it is a car, is not a solution. Also, repainting a road to make a space for a side bike lane and pushing parking spots further away from the sidewalk is putting our elders and disabled citizens into a dangerous situation and total disadvantage . The elders and disabled citizen's parking should be right at the sidewalk not a bike lane away from it. What was done to North Brand BLVD Is Wrong.	7/30/2024 11:23 PM
35	Thank you.	7/30/2024 8:17 PM
36	thank you, survey helped me to be more interested and attention to detail of Glendale plan.	7/30/2024 5:16 PM
37	I never hear any encouragement for avoiding eating meat and dairy from the city or from the Sierra Club when it is clear that shifting diets from meat and other animal products to plant-based diets would greatly reduce carbon footprints and mitigate climate change, as well as improve human health. Please read Climate Change 2022: Mitigation of Climate Change, a report from the United Nations' Intergovernmental Panel on Climate Change.	7/30/2024 4:20 PM
38	Traffic conditions on Windsor Rd between Chevy chase and Glendale blvd are dangerous, traffic drives through at high speeds with little caution to pedestrians.	7/30/2024 9:49 AM
39	I would love for Glendale to be a leader in environmental justice.	7/29/2024 9:03 PM
40	We need more electric vehicle charging stations. We need more filtered drinking water fountains. We need more public restrooms.	7/29/2024 7:50 PM
41	Reduce greenhouse gas emissions.	7/29/2024 7:39 PM
42	Very happy to see Glendale thinking about this. I hope that public outcry over "what is woke" will not impede the city's progress toward making Glendale livable for lower income and unhoused people	7/29/2024 7:05 PM

City of Glendale Environmental Justice Survey

43	Thank you for the opportunity to participate. I wonder if this survey is going out to people who are disadvantaged (who may not be connected to Sierra Club or other similar groups seeking input into environmental justice)... or is it just going to people like me (i.e., privileged folks who have a place to live and food to eat and someplace to go when it gets hot)?	7/29/2024 6:23 PM
44	More trees. More protected bike lanes.	7/29/2024 6:19 PM
45	Thank you for embarking on Environmental Justice.	7/29/2024 4:40 PM
46	My concerns are that the streets need more cleaning such as sweeper should also pass through alleys. Drain should have fence to avoid trash dumping in the street drains. Trash cans and benches should be cleaned often.	7/29/2024 11:52 AM
47	Please stop eliminating lanes of traffic for bike lanes (like on Brand Blvd). It just creates more traffic and no one uses the bike lanes. Wasted tax payer dollars.	7/29/2024 8:09 AM
48	Just worried that driving will become more difficult due to elimination of lanes to promote bike lanes for bikes I have never seen, and "safety". As well as efforts to restrict vehicle travel in a giant city where distance is real and the 15 minute city is absurd.	7/28/2024 7:07 PM
49	Where and when would people be able to see the results of everyone's input? How will they be included in the current/future decisions being made for the city?	7/28/2024 11:49 AM
50	This looks like it would be very beneficial to the people in South Glendale, instead of spending millions of dollars to study the Verdugo wash bike path project, which will only benefit a few.	7/28/2024 10:42 AM
51	more community gardens	7/28/2024 7:48 AM
52	The most concerning part of living in Glendale is the lack of pedestrian safety. I rely on safe crosswalks and sidewalks and regularly find that the crosswalks are not properly signaled (broken lights), poor lighting, poor striping on the asphalt, lack of drivers education on yielding to pedestrians or stopping at the stop bar - all things that put my life in danger in Glendale as a pedestrian.	7/27/2024 9:25 PM
53	Too many cigarette smokers in residential areas and these smokers just throw their cigarette butts anywhere even on neighbors space and property, very inconsiderate and creates major environmental pollution. Also lots of car pollution and reckless drivers. Need more street policing in terms of road and residential rules	7/27/2024 9:24 PM
54	Along San Fernando Rd there are many businesses that use toxic chemicals for body shop work and these are next to residential neighborhoods, I don't feel this is healthy. Too many people smoke and drop cigarette butts on the streets	7/27/2024 6:36 PM
55	THERE WILL BE NO E-JUSTICE IF THE CITY COUNCIL AND SCHOOL "EDUCATORS" CONTINUE THEIR ABSURD FOCUS ON LGBTQ & INDOCTRINATING SCHOOL CHILDREN! GET REAL YOU DARN FOOLS!!!	7/27/2024 1:10 PM
56	I'm glad the City is taking steps to make Glendale a more equitable community. Always a good direction to be going in.	7/27/2024 7:34 AM
57	My biggest issue is the constant dumping of furniture and trash on the streets and waiting for someone to report. I've seen trash left there for months. you need to hire someone to drive around the city and make sure these items are picked up in a timely manner.	7/27/2024 6:42 AM
58	Glendale need wider street to accommodate traffic. Narrow streets create congested traffic which adds to already existing air and noise pollution.	7/27/2024 12:01 AM
59	street swiper every week since I have to move my car every Monday	7/26/2024 10:06 PM
60	Being proactive about environmental justice and incorporating it into the Glendale plan is such a great thing! Shoutout city council, especially you Dan <3	7/26/2024 9:02 PM
61	1. There has been a LOT of helicopter traffic, at all hours, including 10:30 and 11:30 at night. Some have flown so low, my whole 2nd floor apartment shook like during an earthquake. The police said they patrol the streets, not the sky. But I know they own helicopters and cannot think who else might be flying overhead almost daily like that. I tried to find an agency to report it to, or to find out more about the issue and finally wrote to the FAA, but I sincerely doubt they will ever respond or do something about it. 2. When I go for walks, there is bulk trash dumped on streets and alleys, practically everywhere. People do not know they need to call for pickup, and think somebody would clean up after them. I wrote to the former mayor suggesting an	7/26/2024 6:14 PM

City of Glendale Environmental Justice Survey

educational campaign, but I never received a response. Not even an automatic one. On the plus side, I see more and more people clean after their dogs. It used to be horrific, where you had to watch each step so as not to step into poop.

62	The City has existed for a hundred years without this proposed bureaucracy. Who is asking for this? Is this an underhanded scheme to re-install the influence of the home owners associations and NIMBY activists? The City needs housing and the State SB330 has helped to eliminate unnecessary costs and time delays imposed by a minority of NIMBY activists. This City doesn't have an airport, oil wells or oil processing, farming, ranching, mining, heavy industrial plants with toxic pollution or hazardous materials within its boundaries. Again why is the City pushing for this? Do we need another bureaucracy? Does the City want to slow down growth.....and really intrude upon the majority's right to vote on it? When will our council districts be approved? Should there be higher City taxes for those who live high on the hillsides, canyons and severe fire hazard areas and receive the same or better City services than the rest of us? Is it because they have more influence with the city's decision making? Shouldn't renters be paying less for their utilities than those single family residences? The City's housing stock is aging and its dwellers are aging and unable to maintain their properties on their fixed budgets.....but refuse to move into smaller, less expensive living quarters with less upkeep. This City has more important problems to solve.	7/26/2024 2:09 PM
63	Main concerns in Glendale are the criminal element (from Armenia), the air pollution (from cigarette, cigars and now marijuana) and drivers that do not know or refuse to follow the law. We already had a woman struck and killed by a car at the intersection where I live. I do not feel comfortable crossing a street in Glendale. I have had to dodge cars many times when I had the right of way. I have witnessed three cars passing an intersection AFTER the light turned red. I rarely see Police catching any of this.	7/26/2024 1:56 PM
64	We need more park space in this underserved area of Glendale. And better bicycle facilities to get around safely in the city.	7/22/2024 9:44 AM
65	I would love to have places easier to recycle glass bottles, jars etc... I feel guilty to trash glass. I live in an apartment and wish we had compost bins, which I know exist at Glendale. I wish there was more education on recycling. Its soo bad that we create so much trash. And use so much plastic, People need to be educated, our kids need to live on this planet	7/20/2024 11:43 PM
66	More bus lanes and bike lanes needed	6/17/2024 10:47 PM
67	none	6/13/2024 12:39 PM
68	You all need to better respect the Riverside Rancho & Border to Burbank areas !! that is JUSTICE ! Horses & Horse property owners deserve JUSTICE ! due to the extra services they require. Really the "connected" businesses to Glendale city & staff should be TRANSPARENT ! or better yet NON EXISTENT ! <see the attorney on your GWP advisory board for a local Power installer / contractor.... on Victory blvd.	6/13/2024 10:23 AM
69	The city council does not engage the community. It has Ben a problem during the last several years.	6/11/2024 11:32 AM
70	Noise pollution from trains and freeways can be reduced by installing curved translucent sound barriers along train tracks and above the freeway block walls. In Europe, these barriers have been in practice for decades and have proven effective in increasing the quality of life of people living and working nearby. Increasing the no train horn areas.	5/28/2024 12:12 PM
71	I don't believe this is a representative survey as the areas selected are basically a representation of population and not "disadvantaged" for any other reason	5/24/2024 5:56 PM
72	This survey was too short and too general. It doesn't reflect the competing pressures primarily those from state mandates to increase housing and the preferences of long time residents for quiet, peaceful, uncrowded neighborhoods with reasonable commuting times and relatively good air quality.	5/24/2024 4:42 PM
73	There is much dumping on curbs. City should require trash collectors to pick these up on regular trash days.	5/24/2024 8:54 AM
74	Noise pollution is also important since helicopters at night is not a good idea	5/22/2024 2:00 PM
75	Not sure how this can be improved; however, it seems like sometimes the most vulnerable population who needs to have access to services (especially mental health services) doesn't have information on where to go and who to go to. It would be great to do PSAs in different	5/22/2024 12:16 PM

City of Glendale Environmental Justice Survey

languages to connect the community with resources and services in our community. Moreover, to help them navigate the various systems they may be in need of.

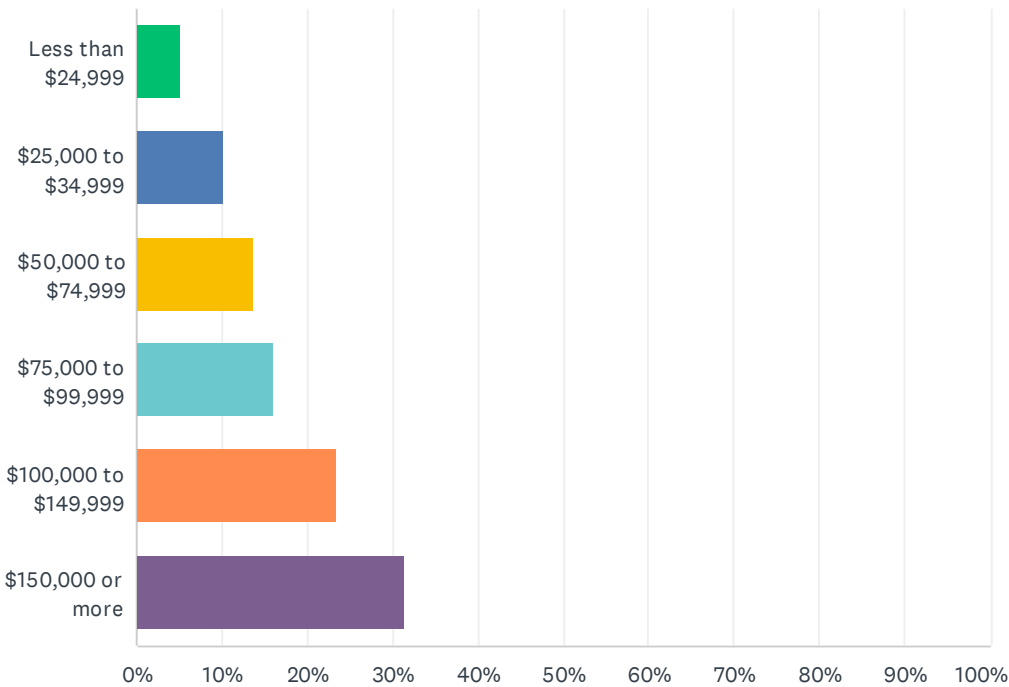

76	Not applicable.	5/21/2024 2:50 PM
77	Please understand costs and realism of implementing quickly directives from environmental justice, as it may impede on other justices, or practical living in Glendale. There needs to be more than "a good idea" for something to be wise.	5/21/2024 11:15 AM
78	I've noticed a rising issue of noise while people are working from home, though I know that's difficult to mitigate. I would also like the City to focus more on getting around as a pedestrian: safer walking and biking, more street trees, education for drivers, city outreach etc.	5/21/2024 9:40 AM
79	We need incentives to go solar, such as a virtual power plant program with home batteries. We need electric school busses and regular busses (Natural gas is not clean, as is falsely advertised by our fleet. cleaner than diesel, but not clean.), as well as an electric City Fleet (especially Parks and PD where they are near children and idle a lot). Frankly, in 2024, polluting our air with known carcinogens is stupid when viable alternatives are readily available. We also need incentives to convert all home appliances to electric. Again, burning gas is dumb in 2024 and beyond. And of course we need more charging stations and for the ones we have to stop being blocked by movie crews and other events. (looking at you City Hall parking lot DC fast charger.)	5/21/2024 9:30 AM
80	I am a city planner and I believe "more than enough" public engagement is better than "just enough." EJ should overcome lack of inclusion, reactive and meaningless engagement. Consider a design-thinking approach to public engagement. Empathize, Define, Ideate, Prototype, Test. Results in early engagement, amplifies voices, and focuses on ideation.	5/21/2024 8:22 AM
81	None.	5/21/2024 7:49 AM
82	Traffic and the associated air and noise pollution is my biggest concern. Glenoaks Blvd, in particular, is a major source of both in my neighborhood and very negatively affects the walkability and health of the surrounding neighborhoods. It should be reduced in its number of lanes and be made to accommodate dedicated bus and bike lanes. There should also be more trees on the sidewalks for people instead of in the median divider. There also needs to be more mixed use zoning in the neighborhood so people can have stores and shops within walking distance of where they live.	5/21/2024 1:32 AM
83	The City Center has incredible planning that we inherited from the first planners of the city. It's incredibly walkable and I can get groceries, grab take out, or enjoy a walk with ease. Please enhance these spaces by increasing pedestrian safety (I see inattentive drivers and hesitant pedestrians interacting multiple times daily). Residential streets, like Louise, are being used as thoroughfares to bypass Brand and Central. Please please please build a large park or several mini parks (or both!), in the City Center. It's ridiculous a city of this size and resources doesn't have a sizeable park in its city center. I've been living in this neighborhood for 5 years and grew up in Burbank prior to that. Please also consider keeping the Verdugo Channel day-lit as part of the bikepath remodel. This would not only help circulate and cool the air in the surrounding areas, but would also create/restore habitat for the abundant wildlife in the area. Thank you, Kevork Babayan	5/21/2024 12:48 AM
84	bike lanes are a waste of tax payer money and dangerous to drivers. Unsafe drivers are a problem	5/20/2024 5:06 PM
85	Not about environmental justice but just how much the city ruined Brand Boulevard between Glenoaks and Mountain. You have caused traffic jams, limited space for buses and cars to maneuver in and especially fire trucks. You have created traffic of vehicles into residential areas instead of keeping it on Brand. Bike lanes are not being utilized by the "bikers" and yet everything is catered to them. What a sh** show you have created. I now have to look at other routes to get to work when Brand was working just fine. Thank you to the city of Glendale and to everyone who proposed and passed this stupidity for all of us that actually live here. GREAT JOB.	5/20/2024 4:42 PM
86	Those most affected by these issues may require other methods of engagement, e.g. schools, churches, leaders, word of mouth, etc.	5/20/2024 4:18 PM
87	The streets are not safe, too many dangerous drivers, I ride ebike and have been hit many times, please help!	5/16/2024 4:50 PM
